# All-in-One Physical Placement

Important

The All-in-One must be placed within connecting distance of both your power source and router.

# Step One: Connecting to Power

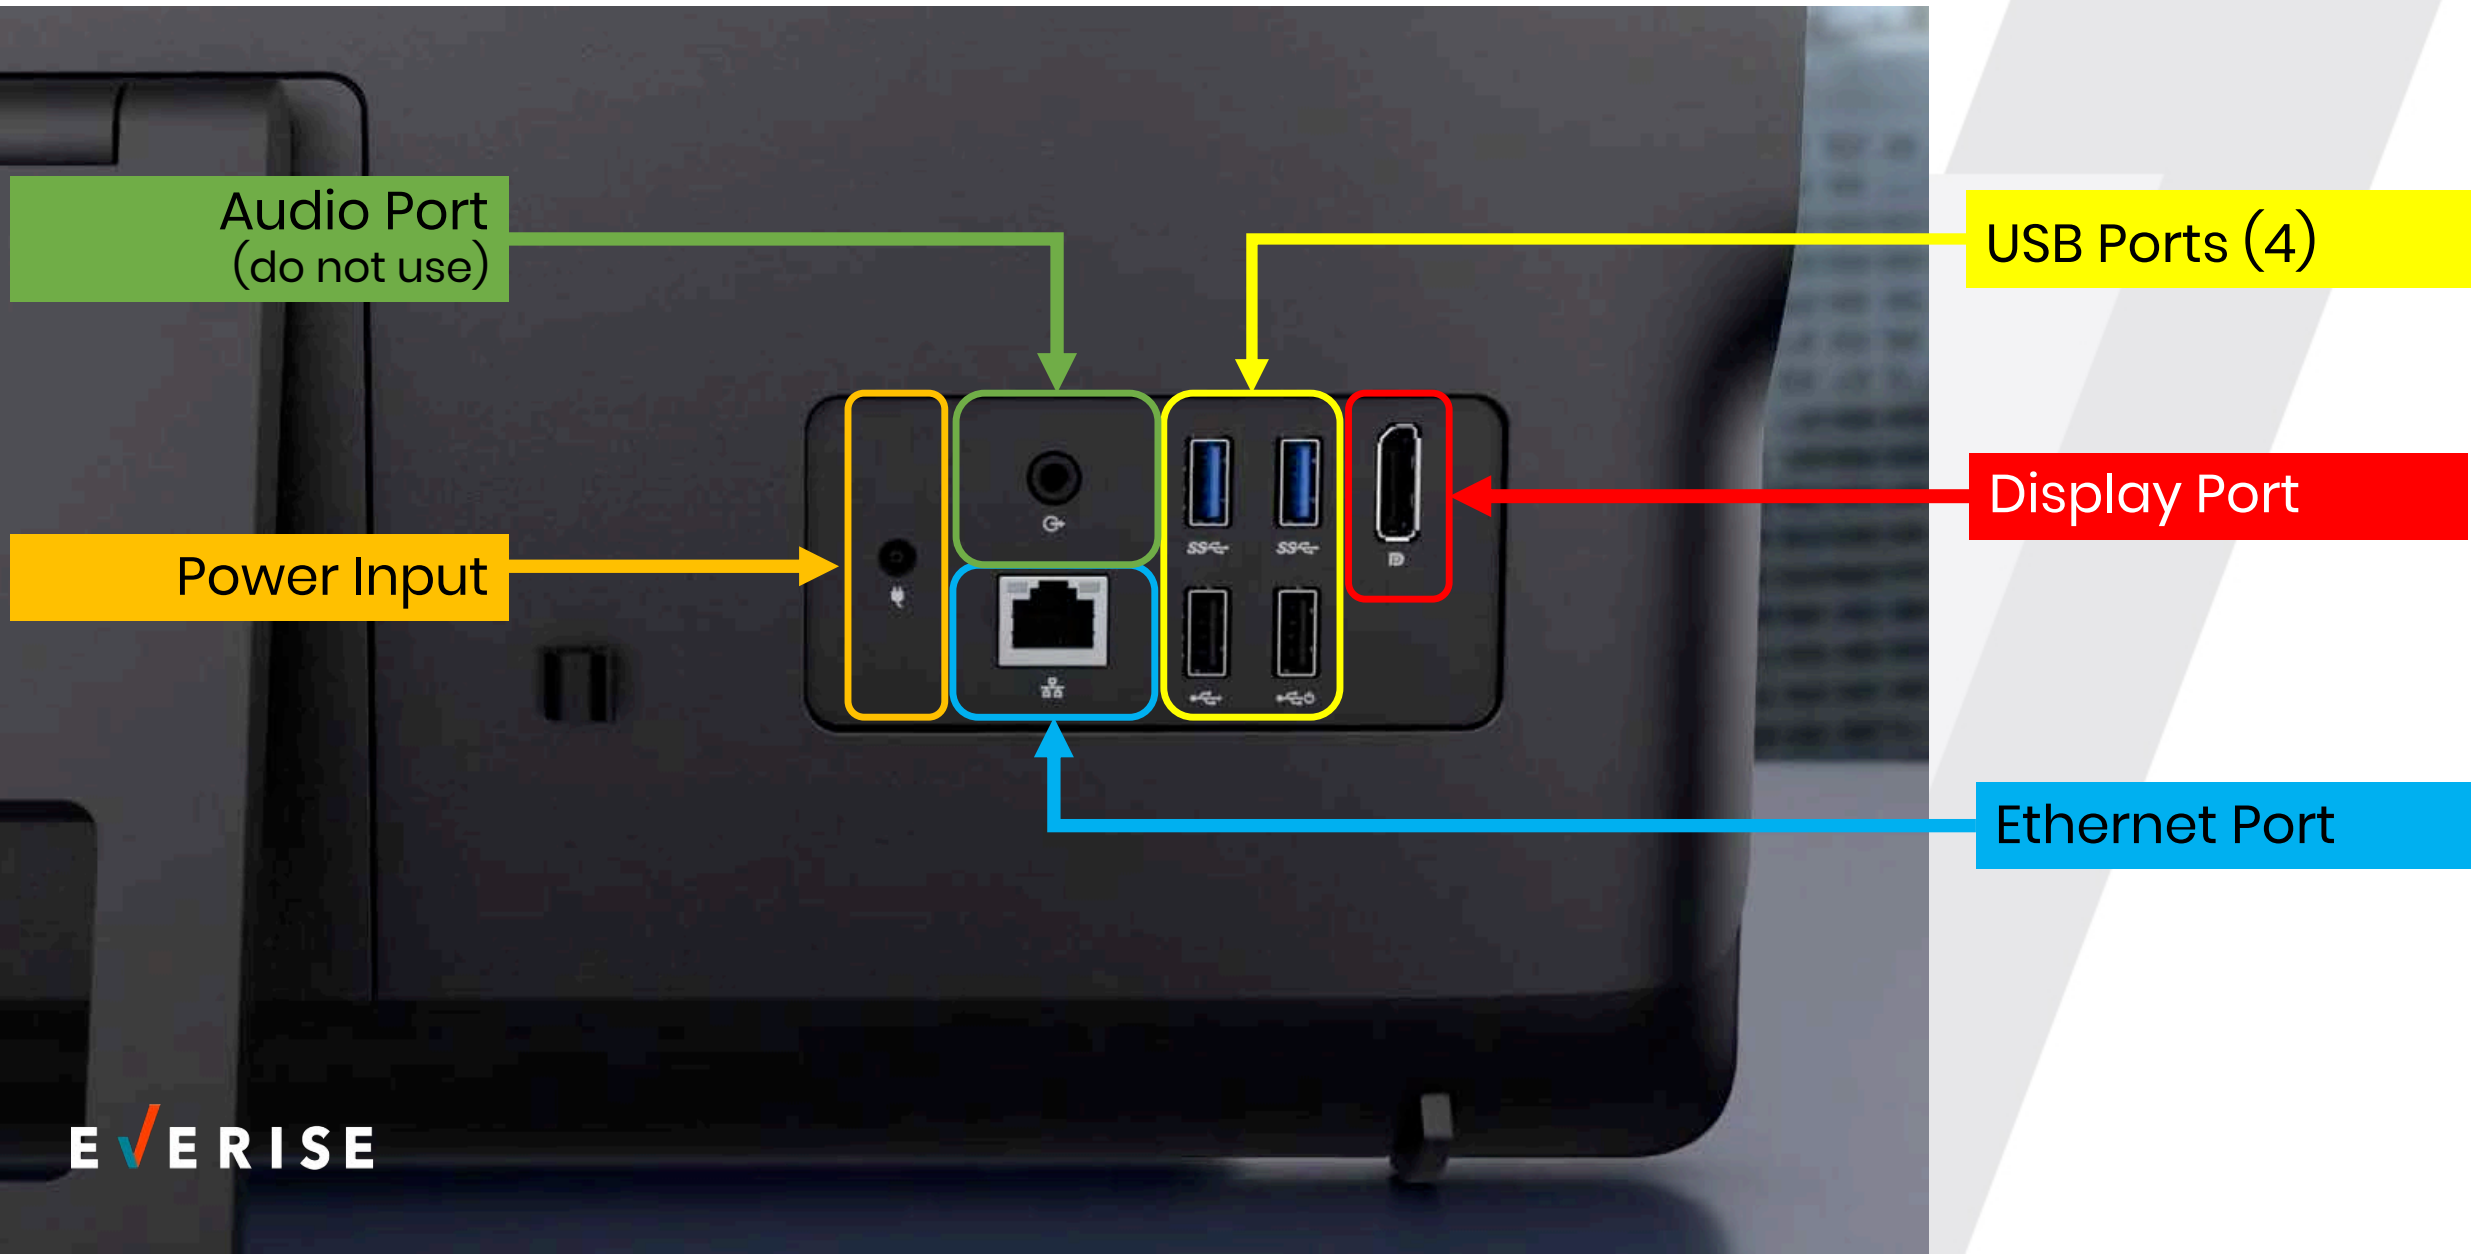

1. Connect power cable to power adapter

2. Connect power cable to outlet

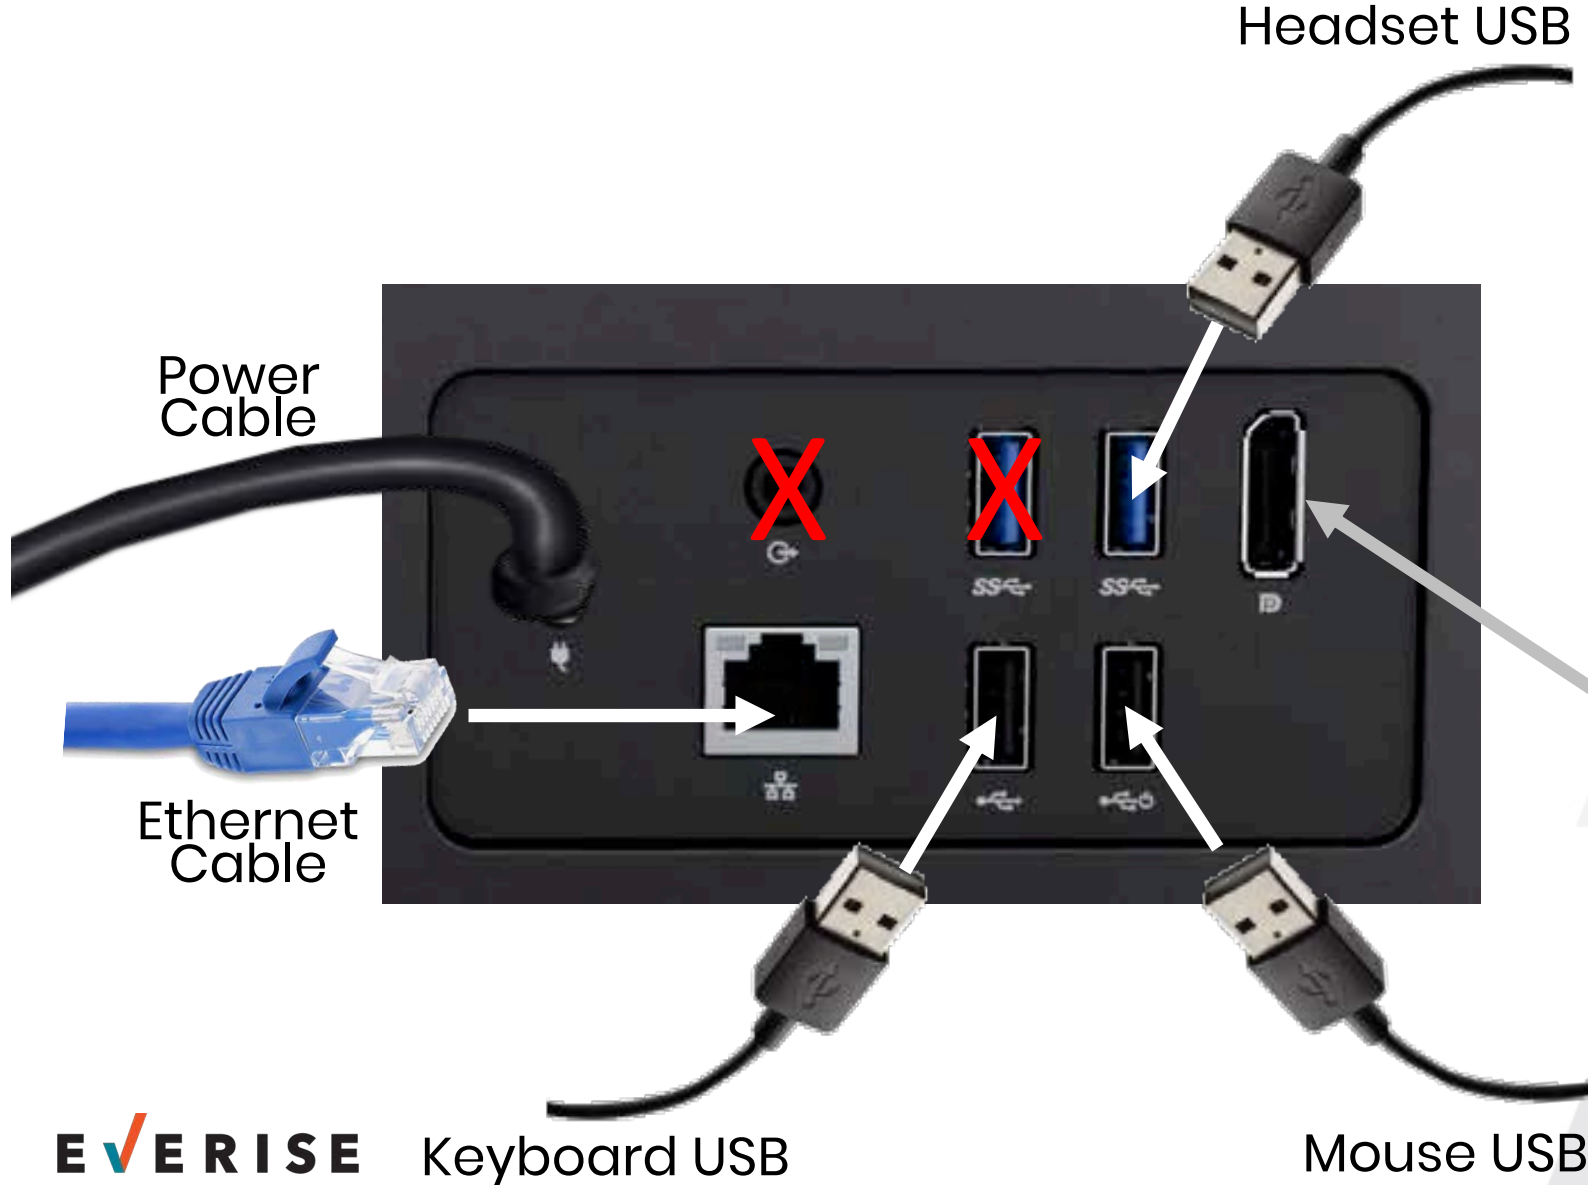

3. Connect power adapter to All-in-One

# Step Two: Identify your cable ports

# Step Three: Attach cables

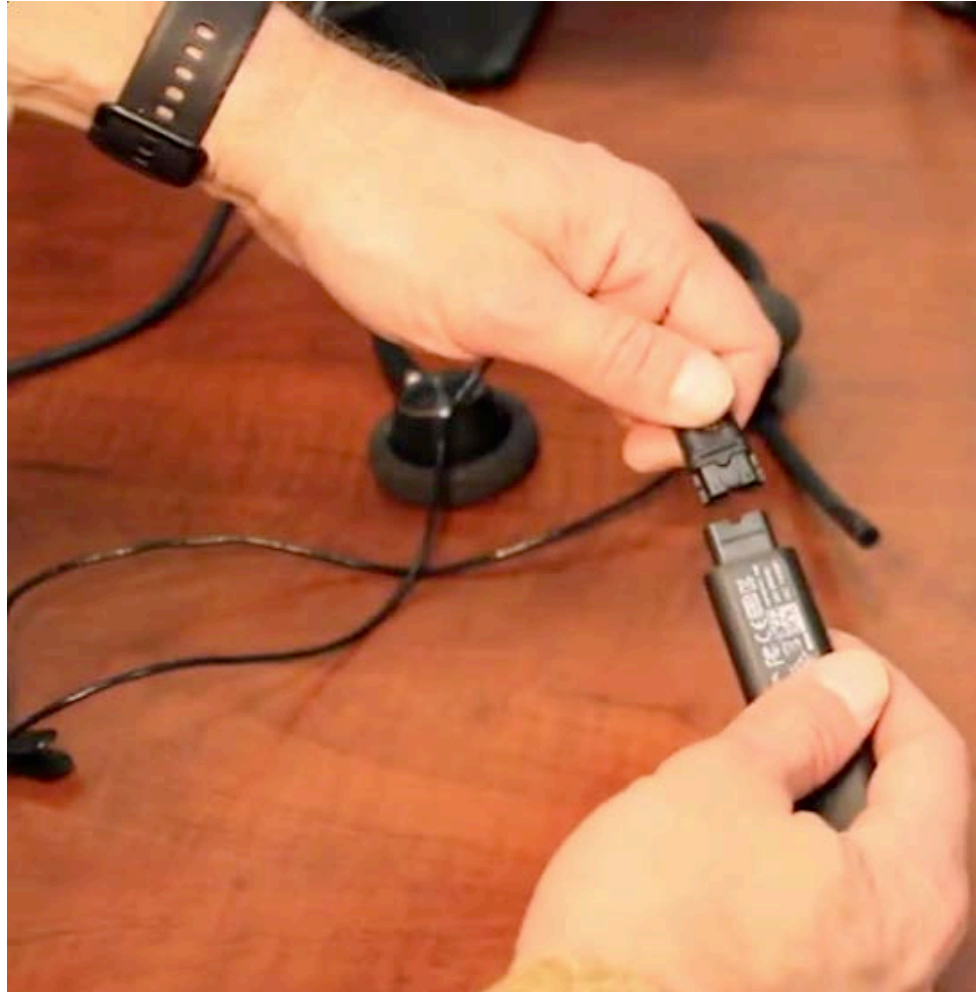

## Important

To add your own monitor to your load-out, follow the manufacturer's connection instructions now.

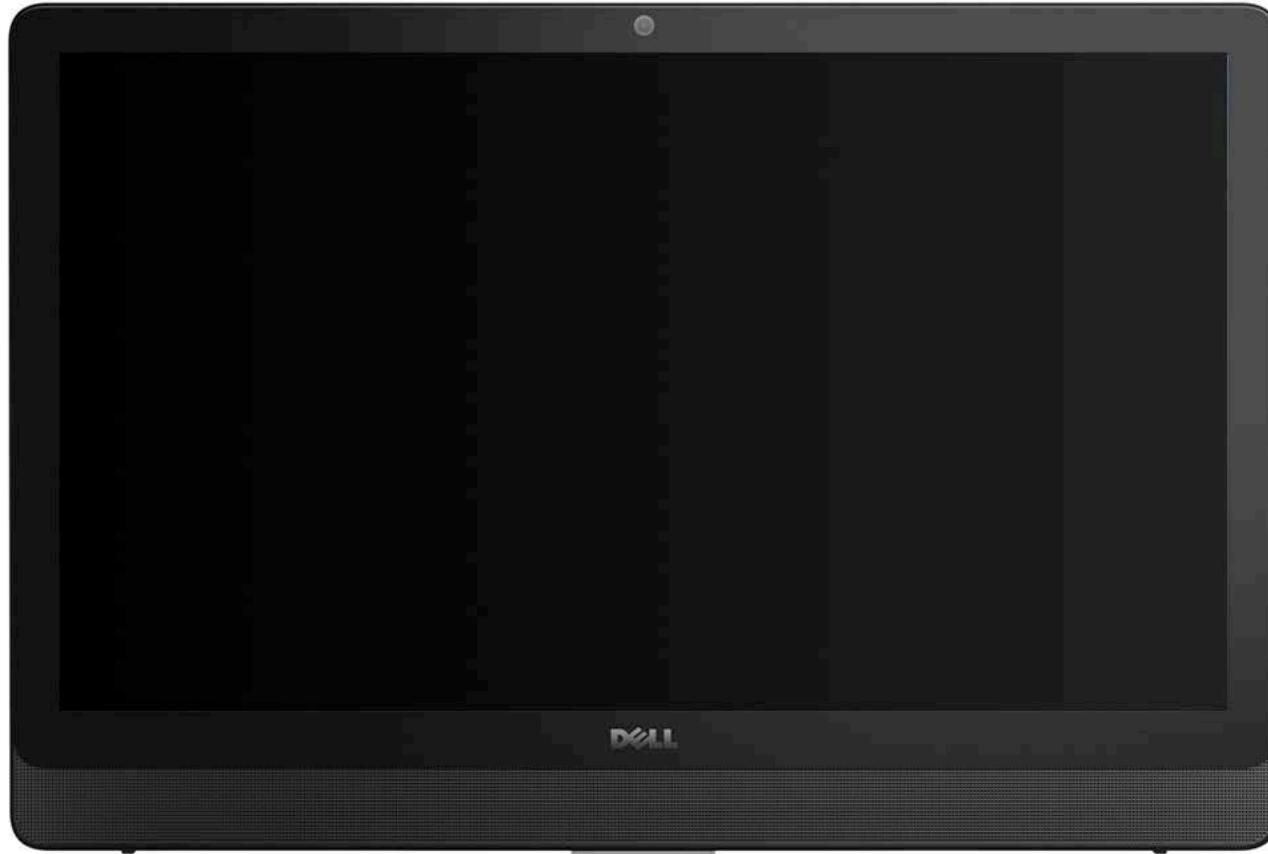

Otherwise, proceed to the next step.

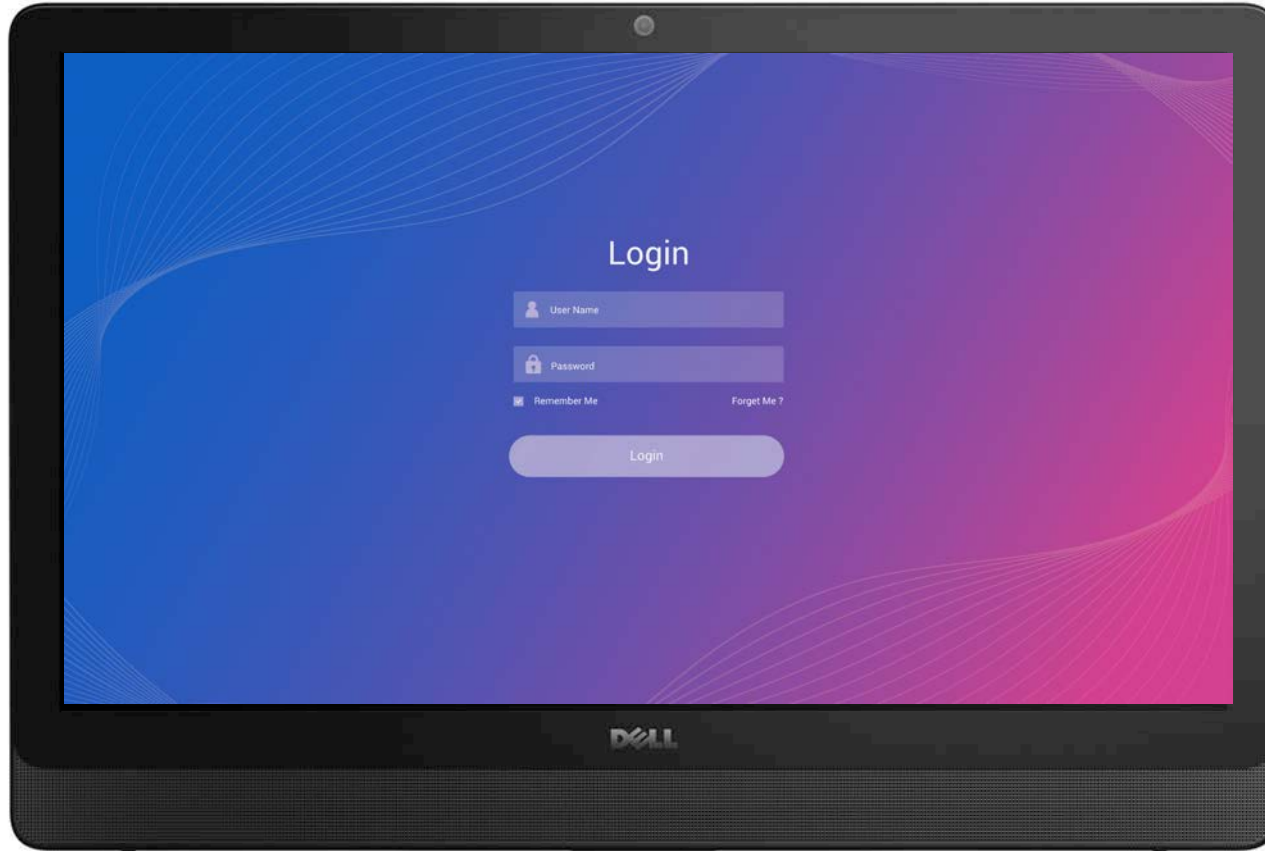

# Step Four: Connect headset to USB adapter, if your headset includes one

# Step Five: Turn on All-in-One

# Step Six: Login to Windows
