

Empower homeworking across VFX workstreams with Virtual Studio

Virtual Studio allows creative agencies, post-production studios, broadcasters and visual effects studios to scale their entire design and production functions into the cloud. Improve performance, scale, speed, compliance and flexibility.

Empower your teams to work from any location, accessing applications like Maya, Houdini, Nuke and Cinema4D from their own devices with enterprise-grade security. Migrate your entire VFX workflows to the cloud, with your scheduler and rendering platforms of choice, for accelerated performance.

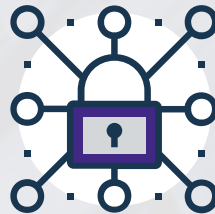

Virtual Studio future-proofs your design and production capabilities for tomorrow's world of work, while supercharging efficiency.

IN PARTNERSHIP WITH

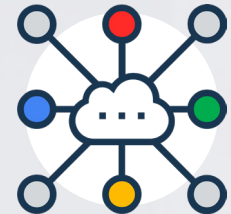

Accessibility

Begin a migration journey to full remote working by phasing out legacy infrastructure

Security

Take advantage of best-in-class technology to guarantee security and MPAA compliance

Performance

Roll out virtual workstations globally to unify all your teams and scale your workflows in the cloud
