GETTING STARTED WITH YULIO

Step 1

Prepare content that is VR ready

Create your model in your CAD software, work with your design team or capture 360-photos.

⌄

Create a cubemap/scene using a Yulio plugin, Yulio Jump or directly from CAD.

Step 2

➕ **Create a New Project**

⌄

☁ **Upload to Yulio**
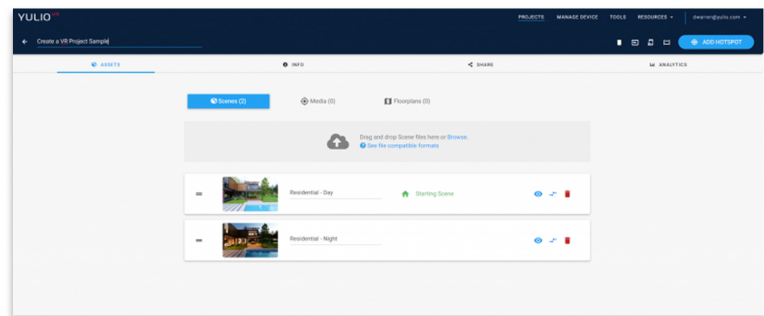

Step 3

Add Interactive Hotspots and a Navigational Floorplan

Step 4

View the project in browser mode or VR, share and launch a Collaborate session.

VR-Ready Content

There are 2 different types of content that you can use with Yulio:

- 360-Photography
- Scenes/Cubemaps

Yulio Jump

Available for CET and SketchUp, create unlimited photo-realistic 360-images or 2D renders with cloud rendering.

Download the Yulio Plugin for:

- SketchUp
- CET Designer
- 3DS MAX
- Rhinoceros
- AUTODESK REVIT

Enhance with Yulio Tools

Add a floorplan, or image, text and audio to bring your design to life with our editing features.

Hotspot Editor

- 🔊 Audio
- ▤ Text Annotations
- 🖼 Image Annotations
- 📖 Floorplan
- ▲ Starting Direction
- ⚙ Settings

Project Floorplan

Navigational Hotspots

Our most popular type of enhancment for engaging projects. These hotspots transfer views from one scene to the next. Be sure to place them where the view will be transitioning to.
