

Guiding an Effective MEDITECH Implementation

Most healthcare executives worry about the known risks of a MEDITECH implementation - from clinical adoption to patient care. Our MEDITECH READY-Certified consultants guide your organization through this complex process to successfully manage change and exceed your performance goals.

Pre-implementation planning

- ▶ Identify key value drivers and how to measure success
- ▶ Establish an effective project governance structure
- ▶ Review total cost of ownership to estimate project cost
- ▶ Define future-state, third-party scope
- ▶ Staff a project team with the right skill sets
- ▶ Give operations a head start on standardizing workflows

Leadership & project management

- ▶ Define change management and communication strategy
- ▶ Guide clinical and revenue cycle transformation
- ▶ Implement comprehensive testing and training approaches
- ▶ Deliver go-live support strategy and preparation plan
- ▶ Advise on long-term staffing for post-live improvement

Success Stories

Multi-Facility Expense Planning

- Planning for MEDITECH Expense implementation across a group of 25 hospitals

Multi-Facility READY Implementation

- Wave 1 of large multi-facility MEDITECH READY implementation:
 - 750+ beds across 3 hospitals
 - Provided Project Manager, Clinical Lead, and Financial Lead
 - Delivered 15 READY-certified subject matter experts
 - Shared 20 physician training and support resources

The Healthtech Difference

360-degree implementation support

Our consultants have experience across all roles and MEDITECH applications and with all types of implementations, including the steps that come before and after. Through lessons learned from our MEDITECH implementation and rollout work with a large number of customers, we ensure you're prepared to execute your plan and transition to a post-live world.

Advanced clinical experience and tools

Our READY-certified team of nurses, physicians, and medication management, diagnostic, and therapeutic consultants deliver a comprehensive set of evidence-based clinical standard content to complement MEDITECH's standard content. They bring trusted experience in implementing MEDITECH Advanced Clinical functionality.

Learning and mentorship approach

MEDITECH can teach you the system, but it takes much more to be successful with it. We bring sophisticated virtual learning tools to the table and show you how to manage the work that lies after go-live, both within and outside the EHR. We leave your team with strong relationships with operations and the knowledge to manage your system going forward.

Enhanced methodology

Our implementation methodology and toolkit expands upon MEDITECH's standard implementation process and provides a comprehensive set of tools and templates to give you a head start on your implementation. Our consultants have a deep understanding of MEDITECH's approach and share experiences that enhance the approach.

We've been really fortunate we've had some great consultants with Healthtech who've been on this journey with us. I consider a lot of these people my friends now, and we still call each other when we need advice. I look forward to working with them on future initiatives.
