

Authorization and Consent to Participate - In-Person IME and COVID-19 RISKS

IME – Independent Medical Examination

Due to the COVID-19 pandemic, IMA Solutions has implemented a number of precautions for the safety of all parties: the assessor, examinee and staff which may include:

- Screening questionnaire for examinees upon arrival for COVID-19 symptoms or travel history prior to the appointment and advising the cancellation of the scheduled assessment(s) if there is any identified risk
- Minimizing traffic in the reception and waiting area as well as maintaining a safe social distance throughout the assessment
- Making available masks, hand sanitizer and gloves on premises
- Instructing our employees to stay home and self-isolate if they have symptoms, travel history or if any of their family members have any symptoms

The above measures may reduce but **DO NOT** eliminate the risk of contracting or spreading COVID-19.

Your assessment was scheduled after agreement from all parties, including you, your assessing medical expert, and your legal counsel.

Please confirm that having reviewed the risks of COVID-19 (attached) you still wish to proceed with your in-person independent medical examination as scheduled.

ABOUT CORONAVIRUS DISEASE (COVID-19)

WHAT IT IS

COVID-19 is an illness caused by a coronavirus.

Human coronaviruses are common and are typically associated with mild illnesses, similar to the common cold.

SYMPTOMS

Symptoms may be very mild or more serious. They may take up to 14 days to appear after exposure to the virus.

FEVER

COUGH

DIFFICULTY BREATHING

HOW IT IS SPREAD

Coronaviruses are most commonly SPREAD from an infected person through:

- ▶ respiratory droplets when you cough or sneeze
- ▶ close personal contact, such as touching or shaking hands
- ▶ touching something with the virus on it, then touching your eyes, nose or mouth before washing your hands

These viruses are not known to spread through ventilation systems or through water.

PREVENTION

The best way to prevent the spread of infections is to:

- ▶ wash your hands often with soap and water for at least 20 seconds

- ▶ avoid touching your eyes, nose or mouth, especially with unwashed hands

- ▶ avoid close contact with people who are sick

- ▶ when coughing or sneezing:
 - cover your mouth and nose with your arm or tissues to reduce the spread of germs

- immediately dispose of any tissues you have used into the garbage as soon as possible and wash your hands afterwards

- ▶ clean and disinfect frequently touched objects and surfaces, such as toys, electronic devices and doorknobs.

- ▶ stay home if you are sick to avoid spreading illness to others

IF YOU HAVE SYMPTOMS

If you have SYMPTOMS of COVID-19 — fever, cough, or difficulty breathing:

- ▶ stay home to avoid spreading it to others
 - if you live with others, stay in a separate room or keep a 2-metre distance

- ▶ call ahead before you visit a health care professional or call your local public health authority
 - tell them your symptoms and follow their instructions

- ▶ if you need immediate medical attention, call 911 and tell them your symptoms.
