

Power Remote Productivity

As more workers adapt to permanent or expanded remote work, they need to be just as productive when working remotely as they are in the office. Remote workers need the kind of performance, power, and connectivity provided by the Acer TravelMate P2. The TravelMate P2 packs a powerful punch with its combined performance, portability, and endurance.

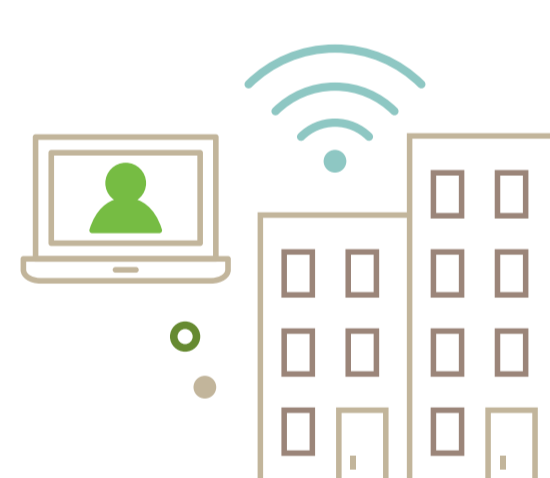

When remote workers find themselves in high contrast or low light situations, the FHD IPS display provides expanded contrast, adjustable brightness, and accurate color representation.

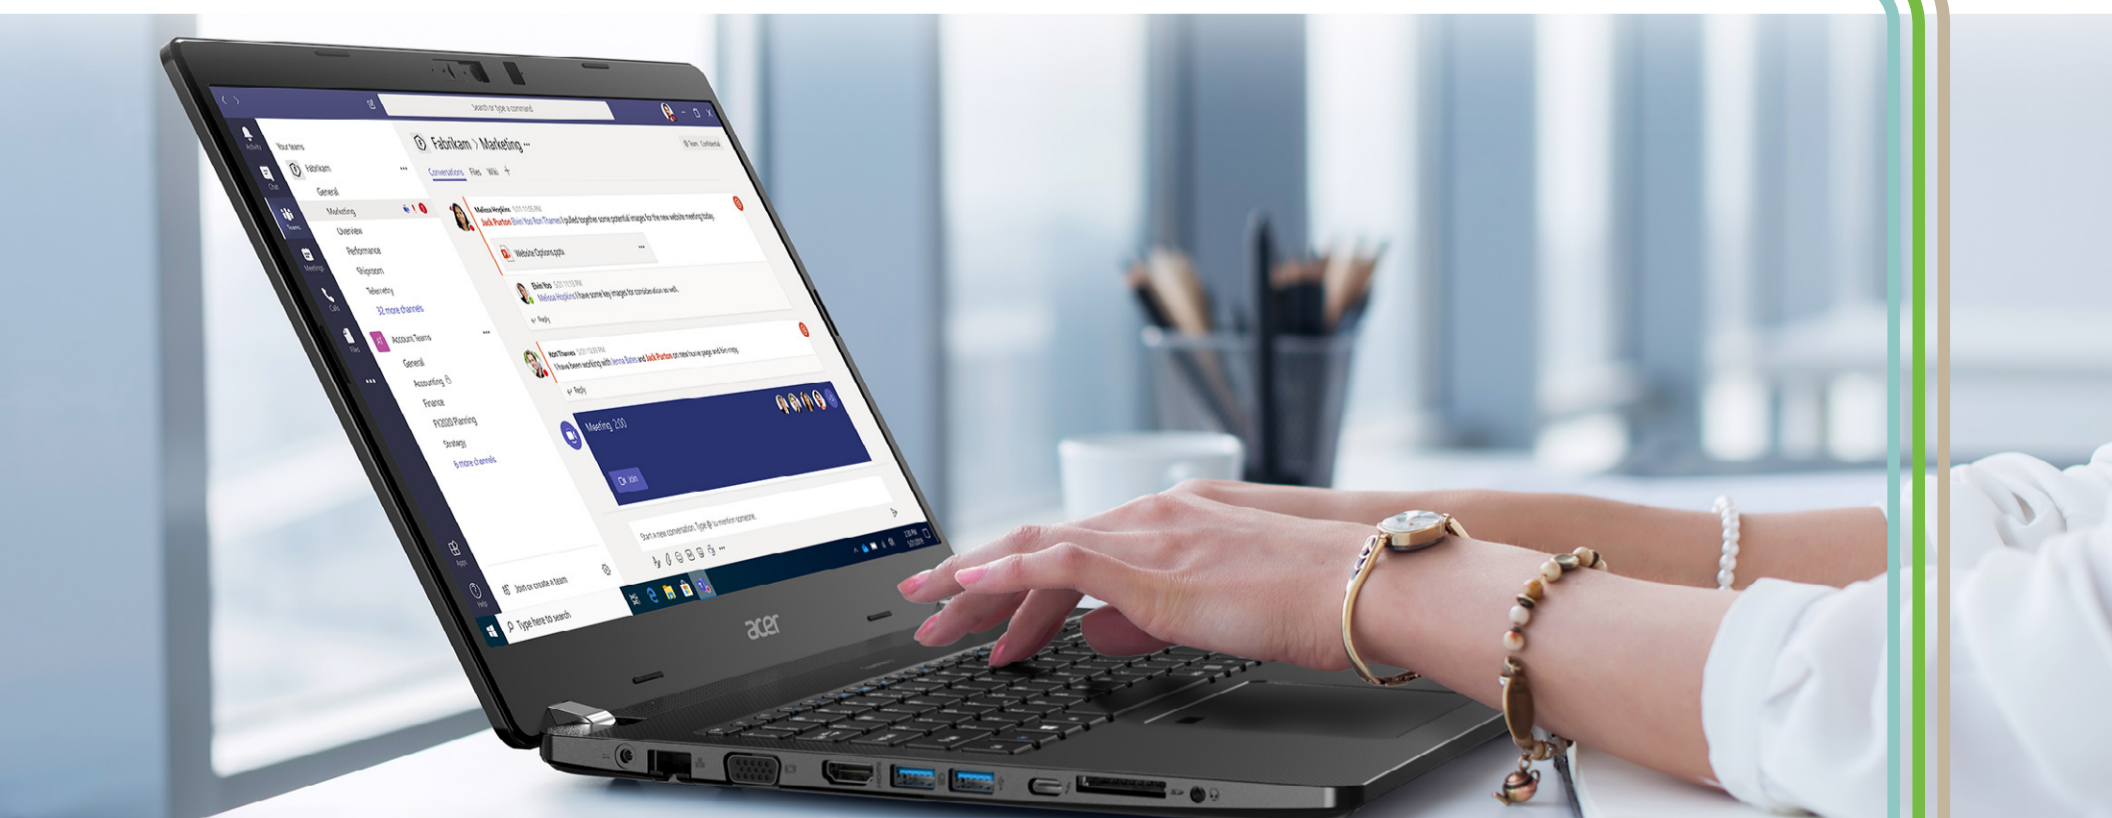

And the TravelMate P2 is powered by the AMD Ryzen™ Pro 7 5650 processor with Radeon™ Graphics, so remote workers will have power and precision graphics.

The TravelMate P2 is built within an elegant, sturdy, and lightweight matte black chassis. It weighs just 1.6kg, for ease of portability.

Security is always critical, especially for remote workers. The Trusted Platform Module 2.0 ensures secure authentication and protects corporate data. The TravelMate P2 provides additional security features as well, such as a camera cover, fingerprint reader, and Windows Hello support.

The Acer TravelMate P2 is the perfect remote worker's companion—providing power, performance, and portability.
