OVERCOME THE UNIQUE CHALLENGES OF WORKING FROM HOME

Working from home (WFH) means different things to different people, but there are universal challenges we all face when it comes to being productive outside the office. Whether it's getting to grips with the etiquette of video calls, collaborating with colleagues digitally, or avoiding distraction from family members, pets, and daytime TV, we all need a little help to work at our best.

iPad is an ideal WFH companion. Portable, powerful, and perfect for collaboration, it works brilliantly as a secondary screen or as a tool for idea-sharing. By adding a few key accessories to iPad it can be transformed into a WFH workhorse capable of adapting to the demands of the home-based workday.

iPad paired with Logitech mobility solutions enables you to transition between workspaces throughout the day to accommodate (or avoid) others in your household who may also be working or learning at home.

This mobile office means you can catch up on emails at the kitchen table with your morning coffee, join a virtual lunch meeting in the backyard, and use the living room to collaborate on a report in the afternoon.

Let us inspire you to create the ultimate WFH experience using Logitech mobility solutions to amplify the performance of your iPad.

ACCESSORIES TO ELEVATE WFH MOBILITY

From natural, comfortable typing to precise cursor control, Logitech accessories enable you to **elevate your home-based workspace** and ensure your iPad is equipped to tackle all the challenges working from home can bring.

**LET'S EXPLORE HOW
THESE THREE ELEMENTS
CAN ENHANCE YOUR
WFH EXPERIENCE.**

Logitech accessories will transform your iPad into a productivity powerhouse and deliver an amplified user experience by providing:

- **An amazing laptop-like typing experience**
- **Superior protection**
- **Easy set up and long battery life**

AN AMAZING, LAPTOP-LIKE TYPING EXPERIENCE

Touch screen technology is convenient, but when you need to type quickly and accurately for extended periods, only a keyboard will do. Whether you are writing emails, chatting over IM, or working on a detailed document, you need the comfort and convenience of a physical keyboard with well-spaced keys and that all-important tactile feedback. Logitech specializes in making keyboard cases for iPad with a broad range of features and modes to meet the needs of each user. This includes detachable keyboard cases with an integrated trackpad and Apple's Smart Connector technology for instant power and pairing.

SUPERIOR KEYBOARD FEATURES

- **Type comfortably** with well-spaced, tactile keys.
- **Work faster and optimize workflows** with a full row of iOS shortcut keys.
- **Maintain typing accuracy** in any situation, day or night, with backlit keys*.
- **Take control of apps** like Keynote and Numbers with a high precision trackpad*.

*Available on selected devices

iPAD KEYBOARDS FOR ALL WORKSTYLES:

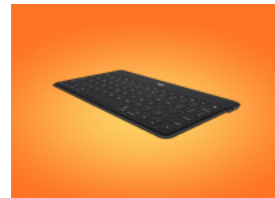

PREMIUM FOLIOS & COMBOS

Laptop-like keyboard, protective case, high-precision trackpad, and Smart Connector technology.

ESSENTIAL FOLIOS & COMBOS

Laptop-like keyboard, protective case, and Bluetooth connectivity.

KEYS TO GO

Ultra-light and portable, spill-proof keyboard with silent typing and Bluetooth connectivity.

Designing innovative keyboards for **over 20 years**, Logitech has won numerous globally recognized awards and channels that expertise into every keyboard.

SUPERIOR IPAD PROTECTION

Moving around the house and even heading outdoors from time to time, WFH can put your iPad through a rigorous workout. As a result, **the accessories you choose should ensure your iPad is ready for anything**, from minor knocks to an accidental drop.

Logitech designs **elegant form fit cases** that keep iPad securely in place as you move from one room to another, while **front, back, and corner iPad protection** prevents damage from bumps and scrapes as well as reducing the impact if your iPad takes a tumble.

ENHANCED PROTECTION

SECURE MAGNETIC LATCH

A number of Logitech cases include magnets that keep the case closed when in transit to protect the iPad's screen.

SHOCK-ABSORBING TECHNOLOGY

Logitech's Rugged keyboard cases feature shock-absorbing technology that exceeds military standards of drop protection.

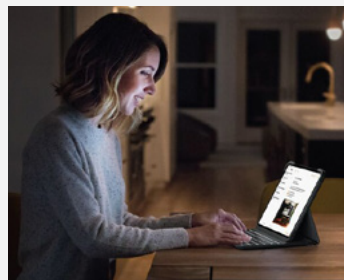

EASY SET UP AND LONG BATTERY LIFE

The ability to quickly connect accessories to your iPad and keep them powered is crucial when working from home. Whether it's to avoid distraction or find a more comfortable space, you may need to change location at a moment's notice, which sometimes means moving away from a source of power or switching to a different input device. Fortunately, Logitech has you covered on both fronts – pairing and power.

SMART CONNECTOR TECHNOLOGY

Smart Connector-enabled keyboards source power directly from iPad, meaning they don't need batteries or charging. Logitech keyboard cases with Smart Connector technology automatically pair with your iPad when attached.

POWER WHEN YOU NEED IT

Logitech's Bluetooth keyboards feature low power consumption, meaning those with rechargeable batteries can operate for up to 3 months* on a single charge, while those with coin cell batteries can go up to 4 years* without having to be replaced.

*Based on 2 hours of daily use

POWER UP A SECOND SCREEN

Logitech BASE charging stand enables you to charge your iPad wirelessly while you continue to use it. Charging will start instantly as soon as your iPad is placed in the cradle, BASE holds iPad at the ideal viewing angle, providing sturdy, rock solid support.

COMPLETE CURSOR CONTROL

Many WFH tasks require precise control that pressing a touch screen can't provide, from working with images and presentations to highlighting text. Logitech solutions deliver cursor functionality by adding a mouse or trackpad to the iPad, simplifying tasks like document editing or work in creative applications like Adobe Photoshop® to provide a laptop-like experience.

BLUETOOTH MOUSE CONTROL

Bluetooth Logitech mice like the portable, powerful Pebble i345 can be quickly connected to iPad to deliver comfortable, desktop-style cursor control when working from home or on the move. Pebble tracks fast and accurately on a wide range of surfaces too, so it's just as happy on the kitchen counter as it is on your home office desk.

HIGH PRECISION TRACKPAD*

The built-in trackpad on Logitech keyboard cases like Combo Touch gives users new levels of control and precision in apps like Keynote, Numbers, and more. You can also use iOS multi-touch gestures on the trackpad to blast through tasks faster. With Smart Connector technology, a Bluetooth connection isn't required, so you can enjoy an uninterrupted reliable lag and cut out free experience.

*Feature not included for every product in the portfolio

PIXEL-PERFECT PERFORMANCE

For note-taking and other more creative tasks, a digital pencil like Logitech Crayon will allow you to **sketch ideas, jot down handwritten notes, and whiteboard concepts freely** like you would in the office. Logitech Crayon provides the freedom to sketch and make notes while enabling the flexibility to collaborate remotely more effectively. Thanks to compatibility with Apple's Scribble technology, you can handwrite notes and iPad will convert it into typed text. Logitech is the only third-party to use Apple Pencil technology, making Logitech Crayon ideal for those looking for a cost-effective digital pencil that's simple set up and is designed for durability in tough environments.

Logitech Crayon allows you to write directly into search fields, draw shapes, and use gestures to delete, add spaces, highlight, and select text and uses palm rejection technology to avoid accidental taps and touches.

The ability to write freely with Scribble and Logitech Crayon adds **incredible value to users working from home**, enabling them to use iPad as a traditional computer or a notepad depending on the task they are performing. For example, using an iPad as a second screen enables you to use Logitech Crayon to make notes and draw diagrams in an online whiteboarding session or mark up a PDF live when collaborating with colleagues for more freedom and flexibility than a traditional video call.

MORE FREEDOM, FLEXIBILITY, AND CREATIVITY

Logitech Crayon is:

- **Compatible with all iPads**
made in 2018 or later, including iPad, iPad Air and iPad Pro.
- **Ready to use instantly**
with no Bluetooth set up required and 7.5-hour battery life.
- **Prepared for anything,**
thanks to its 4ft drop protection and unique anti-roll shape.

WHAT MAKES REMOTE WORKING WORK WITH LOGITECH

Flexibility to take your work with you as you move around the house

Outstanding experiences from leading technology like Smart Connector, Multi-Touch, and Apple Pencil

Ease of use that ensures tools are simple to set up and instantly familiar

Modern, sleek design that complements your devices and looks great in any space

Safe and rigorously tested devices that are perfectly suited to WFH environments

Made to last products designed and constructed for heavy daily use at home or on the go

Power management features that enable you to work as long as you need to
