Fragmented Tools No Longer Work

Almost two-thirds of large enterprises currently have at least 25 cybersecurity products in use[1]

>80% | of CXOs say too many independent tools impacts threat detection and response.[2]

91% | of Enterprises considering or actively consolidating cyber security vendors.[1]
53% | of organizations report a problematic cybersecurity skills shortage.[2]

The Need for an Integrated Cyber Defense

Deploy End-to End
Security Orchestration,
Automation, and
Remediation

Close Protection
Gaps Across Vendors
and Product Silos

Centralize and
Leverage the Value
of Security Data

"Security analysts today deal with increasingly complex threats, fragmented security tools, and siloed organizations. To combat this, we are seeing that the cyber security landscape is demanding a shift to integrated platforms in order to reduce complexity and cost."

– Rich Telljohann, Director of Business Development, IBM Security

Value of Symantec Integrated Cyber Defense
Reduced Complexity of Security Stack

Stronger Security Posture

Lower Operational Costs

Current Investment Protected

"With the integrated approach provided by our Symantec partners, we've effectively got layers and layers of security. Instead of using and maintaining multiple products for firewall, intrusion prevention, intrusion detection, antivirus, and more, we have unified coverage across the entire estate."

– Graeme Hackland, Chief Information Officer, Williams Racing

Symantec: Truly Integrated Cyber Defense

INTEGRATED CYBER DEFENSE

ENDPOINT SECURITY

NETWORK SECURITY

INFORMATION SECURITY

IDENTITY SECURITY

DATA

IDENTITIES

BUSINESS ASSETS

ON-PREMISES & CLOUD

GLOBAL INTELLIGENCE NETWORK

PLATFORM FOR 3RD PARTY INTEGRATIONS

- Unified Cloud and On-Premises Security

- Best-of-breed information, identity, and threat protection across endpoints, networks, applications, and cloud apps

- Open ecosystem with hundreds of third-party integrations

- Shared intelligence and shared management, powered by the world's largest civilian threat intelligence network

Easily Integrate More of Your Security Stack through ICD Exchange

- Leverage common cross-product schema for analytics, reports and dashboards

- Manage data policies across products

- Simplify Symantec and 3rd party product integration
