Virtual Clinical Experiences

THE FUTURE OF MEDICINE IS VIRTUAL, DON'T LET YOUR STUDENTS GET LEFT BEHIND.

Telehealth is becoming increasingly popular for its safety, convenience, and affordability. For your students to remain relevant and provide outstanding care to future patients, they must begin developing telehealth skills now. One way to do so is through virtual clinical experiences, which are becoming more accepted by U.S. residency programs and medical schools around the world.

THE STATISTICS

1/2 of U.S. hospitals offer telehealth services

83%

Of telehealth patients say they prefer virtual visits to in-person care

1/3 of AMO rotations booked in 2020 were virtual

40+

Virtual rotations to choose from

HOW IT WORKS

1. Select your preferred virtual experiences

Tell us the specialties that meet your students' needs—we offer both research/education and patient-care focused experiences in a variety of specialties.

2. Communicate capacity needs

Let us know how many seats you need and the months you would like students to rotate.

3. Oversee student applications and progress

Use our online management platform to monitor student success at every stage.

THE BENEFITS OF VIRTUAL ROTATIONS

They keep your students safe

Virtual learning eliminates in-person contact, meaning there are fewer chances for germs to spread.

They provide letters of recommendation

If your students plan to apply for U.S. residency in the future, this letter can be included in their application.

They introduce telehealth skills

Nearly 50% of medical appointments and consultations take place online and by phone. Virtual rotations allow your students to gain foundational skills so they can provide quality care in the future.

They foster group learning

Most virtual rotations offer multiple seats each month, meaning your students can learn together, even from a distance.

They offer flexibility

Our flexible virtual rotations allow students to select the hours and days they can attend based on those offered.

They are more affordable than in-person rotations

These have fewer associated costs than in-person rotations. The only items students may have to pay for, aside from the rotation fee, are malpractice insurance and a HIPAA certification.

OUR PROMISE TO YOUR SCHOOL

We'll match your curriculum requirements

Let us know the virtual rotations that best fit your core and elective requirements. We'll make sure your students only apply for approved experiences.

We'll honor your evaluations

If student evaluations are required to earn credit, we'll ensure our preceptors can fill them out ahead of time.
