

Virtual Clinical Experiences

PRECEPTING MADE SAFE AND EASY

Virtual clinical experiences allow preceptors to share their knowledge and skills safely and conveniently with medical students around the globe. With the growing demand for virtual medical solutions, more schools and residency programs are recognizing the value of these unique learning opportunities.

BENEFITS OF HOSTING VIRTUAL ROTATIONS

Overcome site capacity limitations

This type of rotation allows you to host multiple individuals at once, providing a great option for practices, clinics, and larger hospital systems to expand program offerings.

Keep your patients and staff safe

Virtual interactions mean fewer people on-site and less chances of germs being spread. To ensure patient privacy, students must be HIPAA certified before they can participate.

Share your experience with a wider audience

Virtual rotations can help students overcome travel limitations and stick to their budget. By hosting a virtual clinical experience, your rotation may be attractive to more individuals.

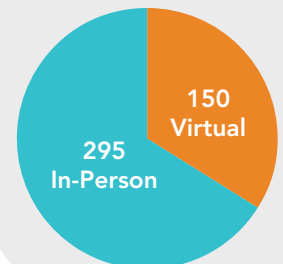

Enjoy increased earnings

The stipend for virtual clinical experiences is the same as in-person programs. As the number of students who participate in your experience grows, the greater your income earnings.

Virtual rotations are becoming much more popular with students and physicians.

HOW VIRTUAL HOSTING WORKS

1. Determine your availability

Set the hours and days you would like to log on and host. Let us know if you're open to flexible scheduling which allows students to select the days and hours they can rotate based on those you offer.

2. Set your program details

Tell us which students your experience is best for and how many you can host each month. Let us know if your rotation will focus on patient care or research (i.e., presenting case studies, participating in research, attending virtual lectures). If your experience includes patient consultations let us know if students will be able to interact with them.

3. Choose your preferred technology

Let us know what technology you will use to connect with students and patients—keep in mind, the platform must be able to connect multiple individuals. We'll require students to use this platform as well and ensure they have a strong and stable internet connection.

Once the details of your experience are in order, we will share it on our online marketplace with an audience of 150,000+ medical students. You will be notified when someone reserves your experience.
