

EasyAid

EasyAid

The innovative plaster dispenser

from ACTIOMEDIC®

EasyAid. Easy life.

Sophisticated design meets uncomplicated handling and efficient functionality.

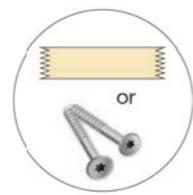

The EasyAid plaster dispenser is mainly defined by its effortless handling and smart design. In contrast to other plaster dispensers, the EasyAid has a completely closed housing. This protects its interior and its contents from dust, dirt and splash water - even in challenging environments. After opening the transparent protective lid, the plasters can be pulled out straight down. This construction, along with the fact that the sealing paper is only removed when the plaster is pulled out of the dispenser, keeps the remaining plasters well-protected from dirty hands and dripping blood at all times.

Its signal color makes it easy to find, turning it into a central and visible emergency contact point. The EasyAid plaster dispenser also benefits from an uncomplicated and quick installation - in many cases

the drill holes of an old plaster dispenser can even be reused (applies to most current models). Alternatively, adhesive strips can be used to mount the dispenser. With slots for up to three plaster refills, the EasyAid offers sufficient space for different types of plasters and can therefore be individually adapted to its field of application. The EasyAid plaster dispenser can also be used by large companies and public institutions thanks to an optionally activatable anti-theft lock.

Another highlight: the integrated Kanban system. Using a reminder directly implemented in the plaster refill, you will always be informed on time to reorder new refills.

Say goodbye to always empty plaster sets and dispensers - say hello to EasyAid!

Clean & tidy

- ✓ removal of the plasters out towards the bottom
- ✓ no dirt or blood drops in the dispenser or on remaining plasters

The EasyAid Reminder

- ✓ implemented, smart Kanban system
- ✓ on time reminder to reorder new plaster refills

3-fold protection

- ✓ offers room for up to three different plaster varieties

Anti-theft lock

- ✓ optional activatable anti-theft lock
- ✓ dispenser housing only opens with the matching key

Well-protected

- ✓ removal of the sealing paper only upon use
- ✓ completely closed housing
- ✓ efficient protection against dirt, dust and splash water

Easy to find

- ✓ signal color orange
- ✓ very good visibility
- ✓ high discernibility even in challenging environments

First aid in just a few steps

Pull the plaster out towards the bottom.

Place plaster onto skin. Pull off second half of sealing paper.

Apply plaster and smooth down firmly.
