

# The Acadia Service Plan

Starting at \$35/workstation, you get the peace of mind that your network is secure and maintained

## Endpoint Detection & Response (EDR)

### 24x7 SOC

Operations Center manned night and day, monitoring your system's cybersecurity and overall health, and responding to urgent needs and service tickets.

### AI-Based Anti-Virus

Uses continuous AI-based scans to find anomalies in your system, and determines whether they're harmless user behavior, or potential malware.

## Foundation

### DNS Filtering

Blocks known bad actors and malicious websites, assuring they never get access to your online properties.

### Network Monitoring

Monitors the health and speed of your website, and ensure it's running smoothly.

### Alert Notifications via Email

Generates automated emails instantly, in the event of breaches, system slowdowns, or more.

### Dark Web Monitoring

Scans for your company's data around the clock, to ensure it has not been sold or leaked onto the dark web.

### Email Spam Filtering

Stop phishing attacks before they start, filtering them and quarantining them, before they reach your staff's inboxes.

### Security Patching

Handles all your security patching for you, ensuring your systems are always up to date.

### Hardware Procurement

Tap into our purchasing power to get your company great discounts on all your hardware, and help you manage your inventory.

## Reports

When you work with us, you can expect an **Asset Inventory** of all the hardware and software you've purchased, and regular **Security Patch Status** reports, so you're always up to speed.

## Online Security Training

As part of our agreement, we offer a world-class online training program your employees take regularly to keep their knowledge up to date, backed up with regular **Phishing Simulation Tests for your employees**, to see what they've learned.

## Server Patching

### Server Patching & Management

\$225 per server

**Additional fees:** Backup Plans customized per client risk tolerance-level and data size. Projects including PC setups priced separately.

**Assumptions:** Client must have a cyber liability insurance policy. Pricing assumes one workstation per employee.

The above pricing effective as of 10.01.2021.

## Is this the right plan for you?

The Acadia plan makes enterprise grade IT services scalable for your SMB. But is it the right fit for you?

### Consider this plan if:

- You have an internal IT function, but they are overwhelmed with staying abreast of security advances and fulfilling employee requests
- You have an internal IT function, and you want to outsource the fundamental security monitoring and maintenance to a specialist while your internal team focuses on servicing staff requests.
- You don't have any IT staff, but want the security and maintenance of your network to be rock solid
- You need bulk discounts and inventory management on your hardware and software purchases
- You need to upgrade your cybersecurity defenses to comply with your cybersecurity insurer

**We'd love to help you get the services you need, at a budget your business can afford.**
