

COVID-19 Animal Welfare Pulse Survey (N= 869)

Third-round results are in! Below are highlights of the survey from December 2020. We're not just looking to inform you, we want to help!

In December we asked you, "**What areas of your operations will be permanently changed after the pandemic (both positively and negatively)?**" Only 8% of you reported not planning to keep any changes, and the majority of you told us you were planning to keep technology at the center of your day-to-day operations. From appointment-based animal intakes to virtual adoptions, there is no doubt that technology can play a significant role in managing your work!

Changes You Are Planning to Keep After the Pandemic

Check out these amazing resources to learn more about how to make technology work harder for you (and the animals)!
