

TWINTHREAD

INTELLIGENT OPERATIONS TECHNOLOGY

Enabling the Next Frontier in Industrial Automation

We empower your process engineers & equipment operators to effortlessly transform their siloed and heterogeneous industrial data sources into intelligent actions to **achieve 100% plant and equipment efficiency globally year after year.**

We solve pressing operations AND maintenance challenges in a scalable and repeatable way and **better and faster than anyone else in the world.**

Features

- Self provisioned product = fast to implement, easy to scale, easy to evolve
- 100% Built in Azure
- Transparent tag-based pricing
- Scalable, automated, repeatable
- Built for subject-matter experts: operators and engineers
- Automated workflows to transform analytics into actions
- Leverage existing investments
- Extensible to Visualization Apps

#1 Platform to Boost Yield + Uptime on your processes AND Enhance Reliability + Efficiency on your equipment

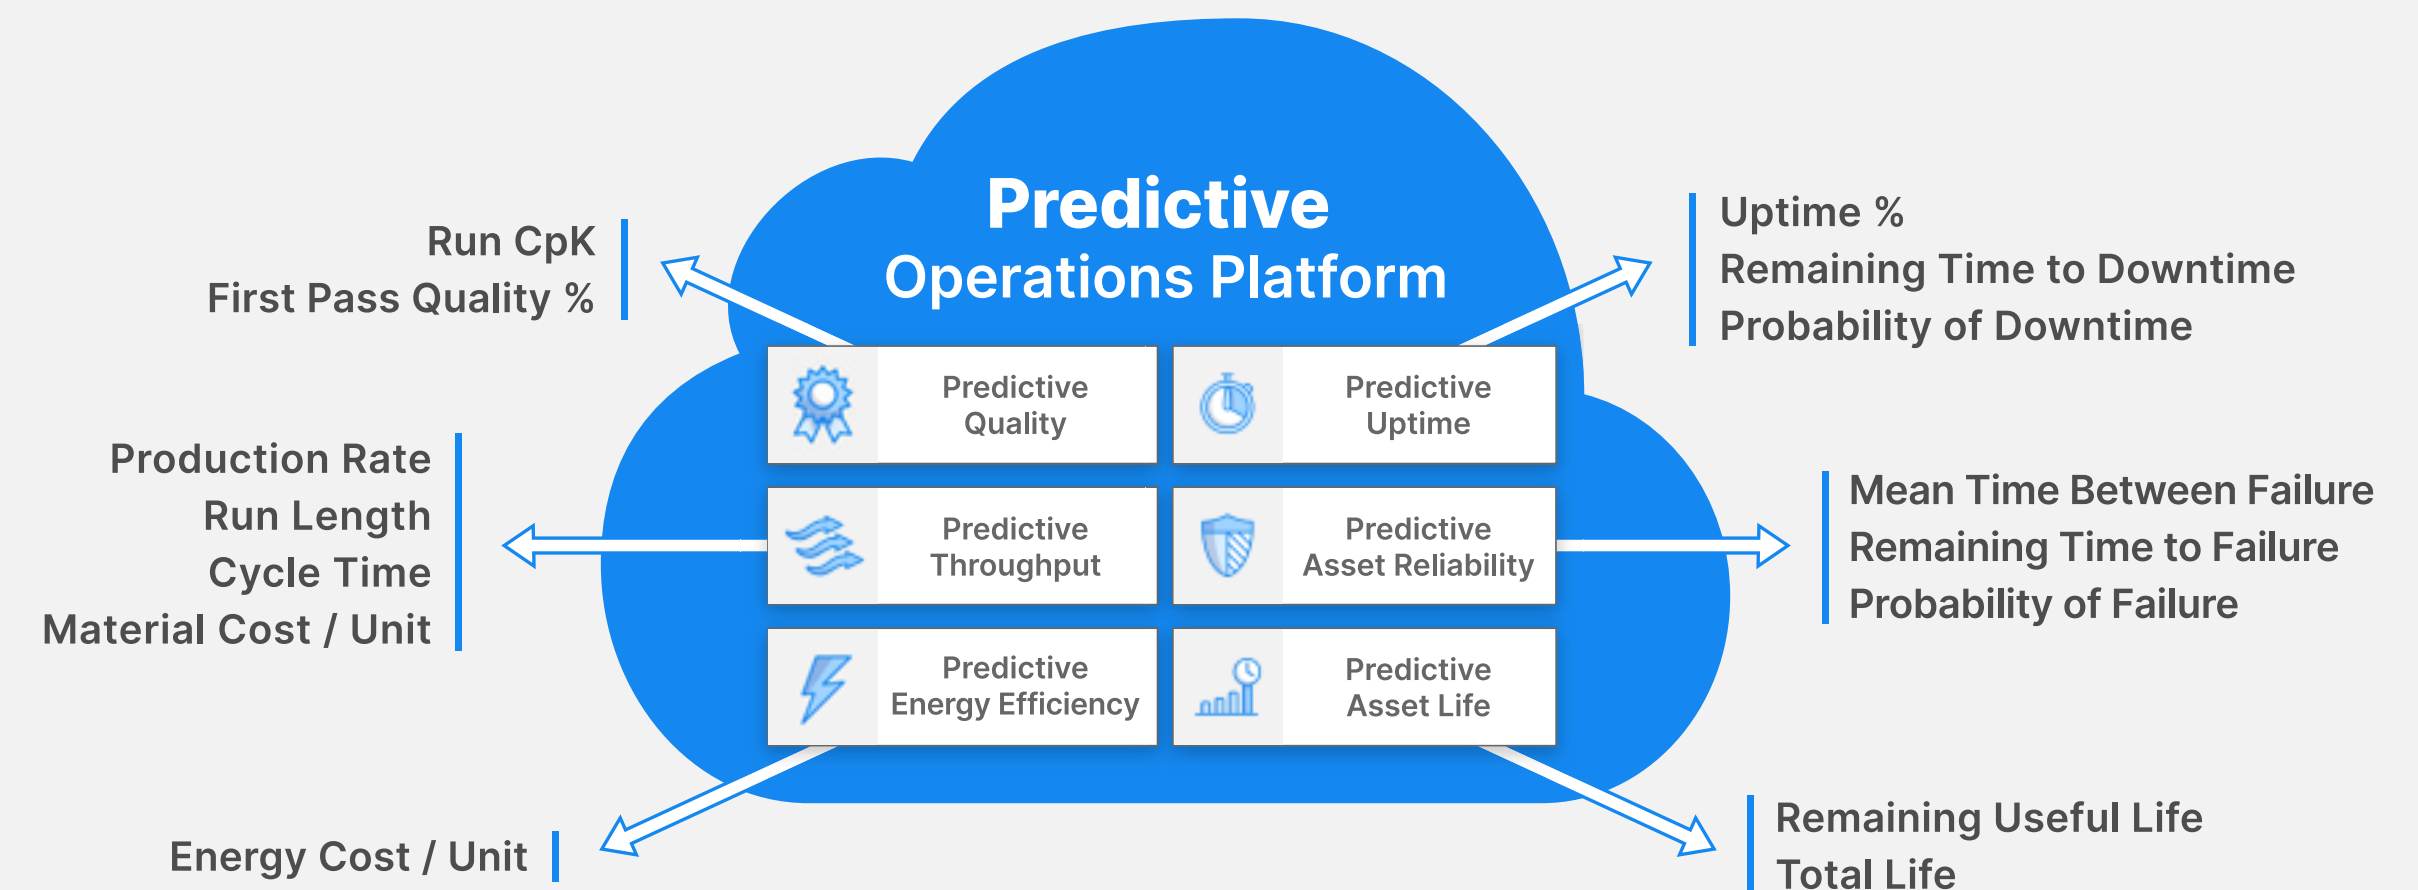

CONNECTED FACTORY

Power your continuous improvement with the most advanced predictive operations technology available.

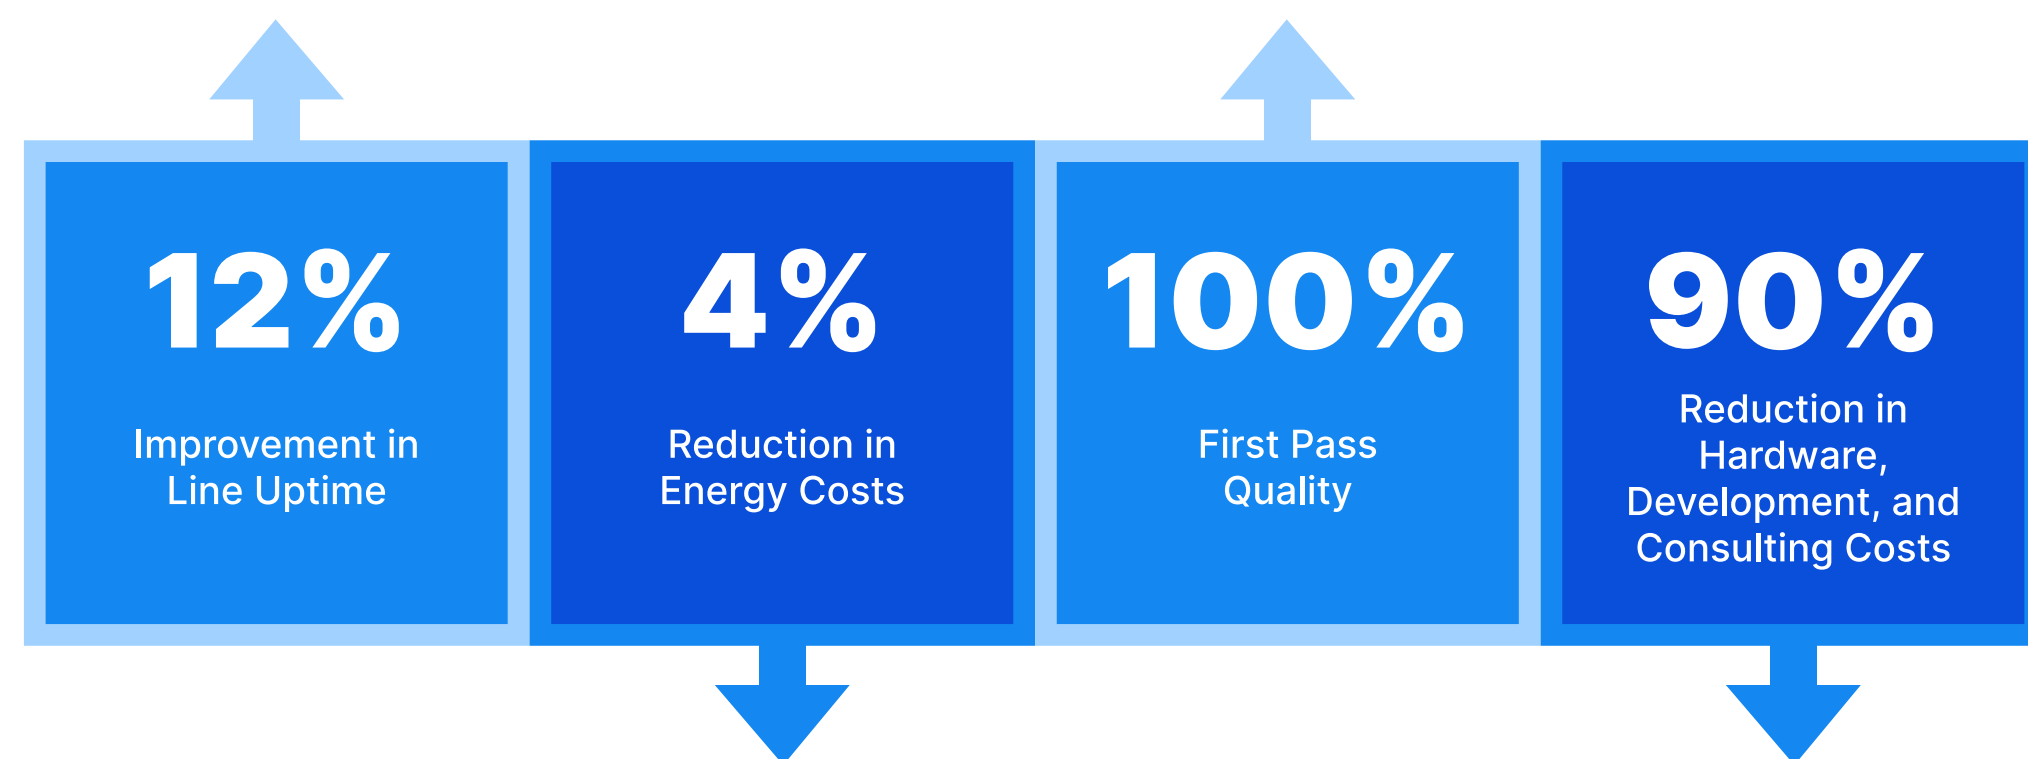

CONNECTED EQUIPMENT

Transform your equipment data into competitive advantage; used on over 1 million assets and counting.

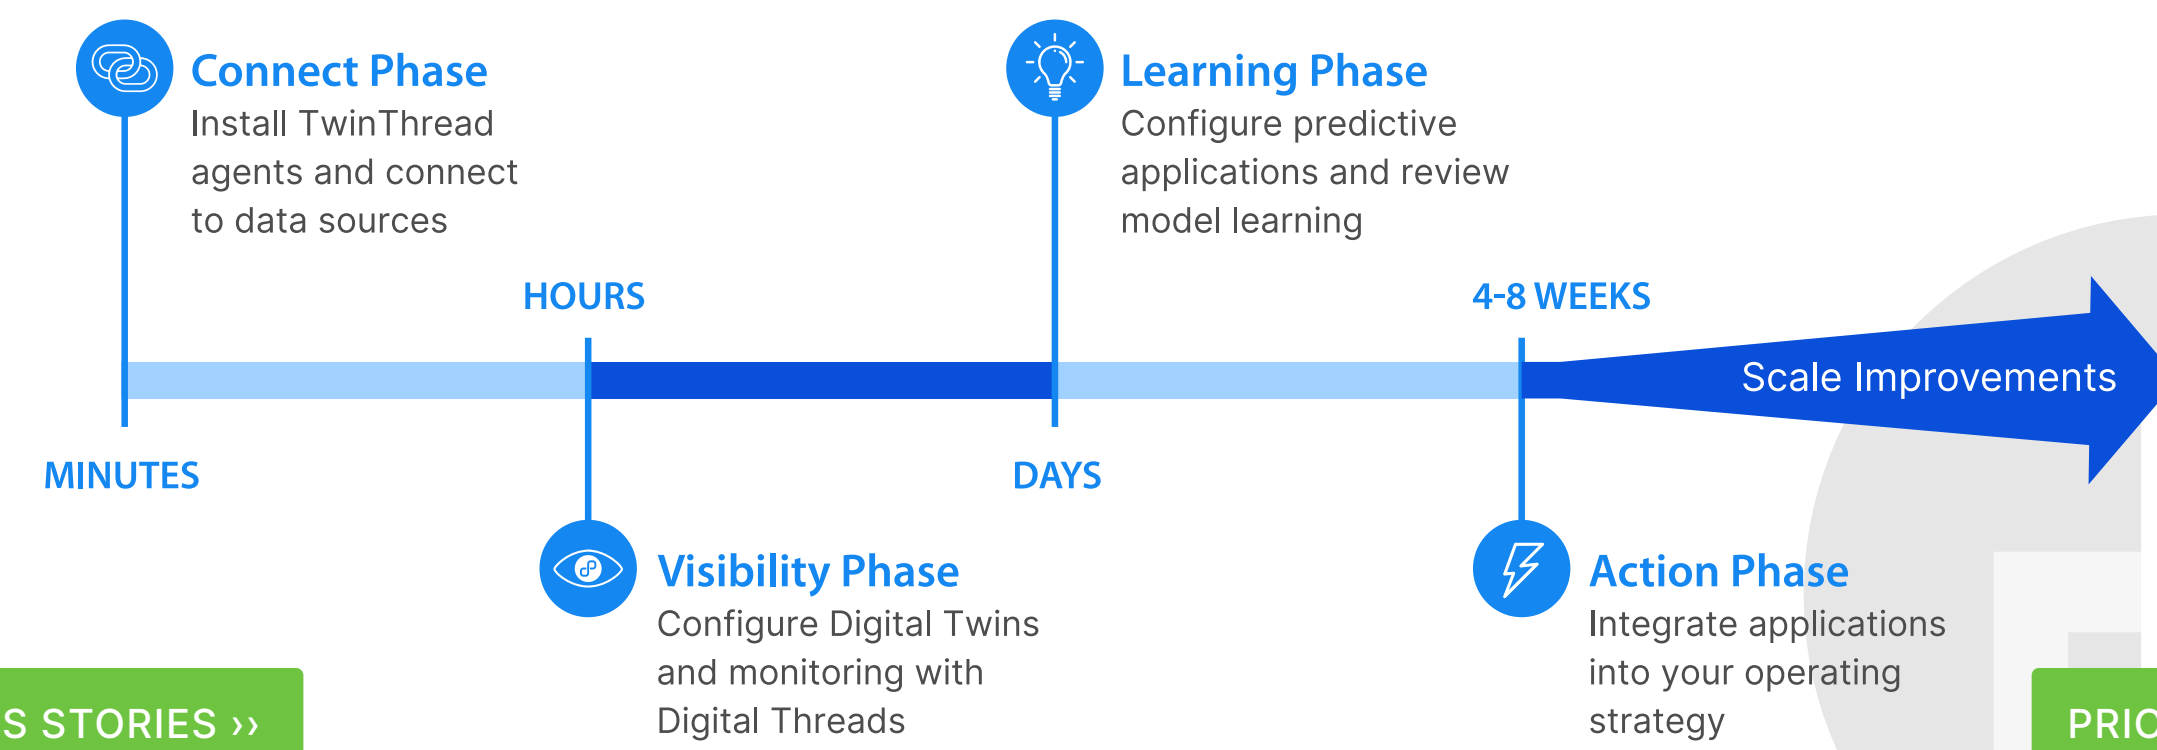

INDUSTRIES SERVED :: CPG | Food & Bev | Oil & Gas | Paper, Packaging, Film Building Materials | "Hybrid" Manufacturing | Equipment Fleets | Waste & Water

CUSTOMER ACHIEVEMENTS :: 10x ROI on subscription investment in 30 days or less

DEPLOYMENT :: Results in 30 days or less, ready for enterprise roll-out in 2 months
