Subject: 3VA Molded Case Circuit Breakers & Accessories

3VA Molded Case Circuit Breakers & Accessories

Siemens Canada is pleased to announce the release of 3VA Molded Case Circuit Breakers & Accessories complete offering up to 1000A, including the new 125A Low-tab frame, and new Stored Energy Operator accessory.

The 3VA circuit breaker family is dedicated to low-voltage power distribution for industrial, infrastructure and building applications.

The 3VA Breakers & Accessories will provide innovative solutions to power distribution designs due to its small footprint, modularity, metering/communication capability, and extensive accessory offering.

Features & Benefits

- Compliance with global standards/certifications including CSA and UL.
- Power metering and communication capability with MODBUS, PROFIBUS, PROFINET protocols.
- Free downloadable software (Powerconfig) for remote parameterization and monitoring.
- Minimum space requirement thanks to the compact design.
- Extensive selection of internal accessories (auxiliary and alarm switches, shunt trips), that are universal to the product line.
- Extensive selection of connection technology, and operators (front- or door-mounted rotary operators, MaxFlex cable operators and motor operators).
- Knowledge manager: technical information on a specific device can be accessed directly via QR code.
