

So, what does this look like? Here are some things we are doing at Ignite School to help students re-adjust to a world where learning and being engaged in learning doesn't require a screen.

1. **Hands-on learning** – Students have opportunities to use manipulatives, games, and activities that encourage active exploration.
2. **Choice boards** – Our KG teams offers a weekly choice board of activities that are developmentally appropriate for our littlest scholars
3. **Gradual Release of Responsibility** – the structure of lesson delivery focuses on releasing the responsibility for learning from the teacher to the student.
  - a. The teacher models the skills or content (I do).
  - b. Students engage in collaborative activities (We do).
  - c. Students complete independent work (You do).
4. **Daily writing prompts** – Students in all grade levels have daily writing prompts. After a year and half of online learning, its time to get back to some paper and pencil writing!
5. **Project Based Learning** – one of the primary goals for this school year will be engaging in long term interdisciplinary projects that require real life application, critical thinking and problem solving.
6. **Field Trips** – With new protocols in place we can use field trips to extend the learning outside the classroom.
7. **Alternative learning spaces** – Ignite School has a variety of labs, studios, and learning spaces outside of the traditional classroom.

**Incorporating technology is still viewed as a best practice for instructional purposes.**

**But the key is quality not quantity!**

What can you do at home to reduce screen time? Follow this link for activities and alternatives to try at home!
