

Middle School

Cell Phones

Other positives include less visual sight of cell phones. I shared last week the personal electronics communication procedure we use in Middle School. We remain firm on these items as they pertain to us being able to ensure the focus remains on the teaching and learning. Will there be times where a teacher asks scholars to use the phone for a photo for a project or other task? Sure, but that is the exception. Teachers need to be able to focus on delivering high quality instruction and scholars have a responsibility to learn to grow.

Uniform

I am seeing scholars remembering their uniform more now, but we still have work to do to get everyone there. I realize Zak's may be out of some sizes. Please do purchase the Ignite zip up sweatshirt, as this is approved. Scholars are not to be wearing a personal sweatshirt, nor any hats unless we have a special occasion. The same applies to our traditional wear; please remind your children not to wear these items unless we have a special observance. We appreciate your support.

Soccer Pitch

Finally, finally our soccer pitch is open! I know the scholars have been waiting to use it, and now that we can, we will! Having a different environment outside in the afternoon is healthy for scholars and teachers.

Grade 7 C

Looking ahead to next week, we add Grade 7C due to expansion and this addition affects teachers, scholars and the master schedule. Please bear with us and be supportive of the changes as we install adaptability skills and flexibility for scholars. These changes happen to do better for our entire learning community.

Need to get in contact with me?

Always contact the classroom teacher first for academic matters. If it is unresolved, please let me know so I can be involved to be part of the solution in partnership with teachers and families. You may phone the school during working hours if you need to schedule an appointment, which is appreciated and preferred so we can both give full attention to one another. The Reception will transfer you to my line or voicemail so we can talk. You can also contact me on WhatsApp at +971 0508915972.

We keep forging ahead and as we do there are many things to celebrate within our new Middle School learning community.
