Qualified Remodeler Magazine Names Hogan Design & Construction Bronze Master Design Award Winner

Geneva, IL (October 22, 2020) – Each year, Qualified Remodeler Magazine showcases creative solutions in the remodeling and construction industry, awarding three companies with the coveted Master Design designation for extraordinary project excellence. Hogan Design & Construction (HDC) was named the 2020 Bronze Master Design Award winner, selected from hundreds of entries in the 42nd year of the award program.

Master Design Award submissions are judged by eight industry professionals, scoring project entries across 22 categories. Each year, Quality Remodeler Magazine accepts project entries from companies across the country. Project entries from this year were deemed some of the best in the history of the award program. HDC's award-winning project was an 800 square foot kitchen remodel in Geneva, Illinois. The angular layout of the kitchen posed several difficult design aspects. The challenge, create a brighter, more open-concept area for cooking and entertaining for better day-to-day functionality. The original kitchen layout was confined and congested and didn't lend itself to ease of use. "By addressing the traffic flow and odd angles, we were able to deliver on our client's expectations," said Brian Hogan, Owner of Hogan Design & Construction (HDC).
