

# Important Patient Information from OralCDx®

---

Your doctor recently performed an in-office brush biopsy (BrushTest®) to rule out the presence of abnormality in a lesion that was found in your mouth.

The laboratory utilizes advanced computer imaging and molecular analysis to help capture the earliest evidence of abnormality. The technology and expertise employed by the specialized laboratory is proprietary and not available elsewhere.

## The laboratory fee:

CDx directly bills your medical insurance carrier for its analysis. The laboratory is currently in the process of becoming an “in-network” provider with most medical insurance plans. In the interim, you will not be responsible for any “out-of-network” fees associated with these plans. CDx will follow the in or out of network status based on your primary insurance coverage status.

## What this means for you:

In Network Plans: If CDx has a contract with your medical insurance, we are contractually obligated to bill standard co-pays, co-insurance and/or deductibles which your plan (including Medicare and Medicare Advantage) calculates as patient responsibility.

Out of Network Plans: If CDx is not contracted with your medical insurance, you will not be responsible for amounts not covered by your insurance. Out of network insurance companies have been notified of our billing policy.

In the coming weeks, you will receive an Explanation of Benefits (EOB) from your insurance company. The EOB is not a bill. If we are required to collect a payment from you, please wait to remit payment until after you have received an invoice from CDx.

Alternatively, some insurance plans send payments due to CDx Diagnostics Inc. for its laboratory services directly to the insured/policyholder. If you do receive a payment from the insurance company for our services, no need to wait for an invoice, please forward that payment with a copy of the EOB to:

CDx Diagnostics, Inc.  
PO Box 5124  
White Plains, NY 10602-5124

---

For patients without medical insurance,  
payment arrangements are available.
