

Tendon Systems is a premiere provider of concrete scanning and concrete coring services and are leaders in Post-Tensioning construction. Our highly experienced teams are at the ready to provide Ground Penetration Radar services for all kinds of scenarios:

- Checking for voids that may have occurred during the concrete placement
- Determining if MEP conduit was installed in the wrong locations
- End client made floor plan changes after the concrete was poured
- Relocation of MEP conduit due to re-purposing a structure

**Our teams are highly experienced and qualified, but the most important aspect about working with Tendon Systems is our commitment to make our clients happy.**

In addition to quality work, Tendon Systems is committed to making our clients happy. Not only will we provide the best scanning and coring services, we operate as a client-centric company, always.

That means that we guarantee our work! In the event that repair or replacement is needed for any post tension cables that incur damage during our concrete scanning and coring process, Tendon Systems takes on the burden of these repairs. Because these can range from \$7k-\$10k per cable, clients can rest assured that we take our work quality seriously and are willing to reduce risk, even at our own cost.

Tendon Systems' full service team will provide the customer a smooth process from start to finish. We strive to provide you with peace of mind knowing that we are equipped to handle the job from start to finish.

Tendon Systems have offices in Atlanta but can provide project support and work in locations around the country. We are a trusted provider for some of the biggest construction projects in the country. We are a trusted provider of expert post-tensioning, barrier cable, restoration and engineering services for some of the biggest construction companies in the country.

**We take our work quality seriously and are willing to reduce risk, even at our own cost.**

## Services

- Concrete Scanning & Coring
- Concrete Scanning Only

## Who We Serve

- General Contractors
- Concrete Contractors
- MEP Contractors
- Engineers
- Building owners and managers

## What We Offer

- **Cable Free Guarantee** - If we provide both concrete scanning and coring services, we cover the cost of materials and labor to repair or replace any damaged or broken PT cables that occurs during coring.
- **Scanning and Coring** - Many scanning companies provide only that, concrete scanning. Tendon Systems provides both services. Our trained technicians understand Post-Tensioning and know how to accurately perform this work.
- **In-House Service** - We are a manufacturer of the highest quality PT cables and have a full-service engineering department that can provide technical assistance throughout your project.
