

# Yard Management, Warehousing & Transportation Services

**Better manage your supply chain with**

## ATS ADVANTAGE

Let your supply chain manage itself. Rather, let ATS handle the logistics for you. In addition to the dedicated on-site yard and warehouse management, ATS utilizes our support staff professionals in the areas of supply chain engineering, warehouse management, inventory management and information technology services.

### *ATS Logistics Services On-Site Programs include:*

- Inventory management and preparation of shipments
- Transportation management services and technology
- Yard/warehouse management
- Staffing/Hiring/Training
- Experienced logistics personnel
- EDI at IT support services
- Inventory management services and technology
- Carrier/mode coordination
- Order management

*Scheduling • Consolidation • Tracking*

- Short and long-term storage
- ISPM-15 compliant
- DOD approved - ATSM 3951

CAGE CODE #7S3N4

## STORAGE YARD/WAREHOUSE MANAGEMENT

Your equipment will be right where it needs to be with strategically placed storage locations throughout North America. It will be handled with care using the necessary cranes and safety handling equipment for loading and unloading. For your peace of mind, we secure each location and utilize a guard service during overnight hours. We also provide proper dunnage and securements necessary for transporting and storing freight in the best ways possible.

Services include:

- Storage locations for components across North America
- Strategic transportation services to shuttle all designated components to the storage yard
- Crane services to unload components at the yard
- Security at all storage locations
- Pick up and delivery coordination
- The ability to track each component stored in the ATS Inventory Management System
- Equipment to properly handle components
