the Bundle.
Spirals, slopes, horizontals, verticals make the **Bundle** a celebration of human activity on a monumental scale.
The areas around San Jose are an icon of excellence in human activity: innovation, education, entertainment, adventure and sports. We translate this human energy into lines which become the architecture of two structures, a vertical and a horizontal one, connected via a 600' long zip line.
By fusing together hiking, mountain biking, sliding, ladder climbing and panoramic sightseeing with tennis, reading, partying, exploring, education, working we create an architecture that reflects the unparalleled energy of San Jose.

the Bundle

hike

slide

great views of San Jose from viewing platform @ 105'!!!

To work out and have fun at the end of it!

We can hike up to the 4th level and then slide down.

I can ride up to the 60' platform and down on the dedicated spiral ramps. great work out!!!

playing tennis in a shaded hall, while having access to the outdoors is exhilarating!!!

having a full view of the confluence and the Bundle makes work so much more pleasant and easier

It is inspiring to be able to have poetry readings in the educational area

In the upper part of the tower one can climb on ladders. The tower is covered with a mesh that allows for ventilation and gives you a sense of enclosure and protection!!!
