

SAN JOSE

Silicon (Si)

*Frontier of the Future*

For the past decades Silicon Valley are the forefronts of innovation throughout the world. The birthplace of technological invention of human tireless future advancement.

Geographically, San Jose is a vast form of widest land, from the open orchard farm land long before with natural flowing streams of Guadalupe River valley split and connects to Los Gastos Creek. The union of this two river merges in "Confluence Point" of innovation flows together like water in the rivers that has no end, an infinite form of cycles through its ecosystem, balancing the inhabited life and environment.
