

PROJECT SUMMARY – THE PEARL *at the confluence*

A mirrored orb during the day, and a vibrant spectacle of light throughout the night, The Pearl is surrounded by five dancing rings that echo the sinuosity of the river and creek that run through the site in a design that is meant to represent the peaks and valleys of creativity, the unevenness of thought, and the graceful choreography of minds that result in the birth of life changing ideas. This unmistakable silhouette works as a metaphor for the ever-growing inclusive nature of innovation and the societal development that comes with it.
