

Project Summary

THE STEM is a monument to science and technology, innovation, and all the people of Silicon Valley — a place that activates the landscape, engages the public, and celebrates creativity. Rooted in the earth, THE STEM reaches for the stars with a spire of intertwined light and steel of mathematical perfection. Educational galleries and coliseum seating in the base provide a community space to gather, learn, and reflect on who we are and where we want to go together as a society. This magical space, full of knowledge, celebrates the contributions of innovators past and inspires the heroes of the future.
