

## VALLEY

The geographical Santa Clara Valley allocating innovation, startups and manufacturing companies took the name of Silicon Valley based on the initial silicon-based technology. We take the term and geographic form to retroactively project the *Valley*: an angular wooden structure overhanging the entire Arena green without touching it. It creates two public realms: a comfortable shaded park under an unparalleled icon, and the largest wooden amphitheater on earth, shaped distinctively on its sides which distribute programs such as museum, restaurants and cafés. The Valley project is a stimulating void to display any type of cultural and technology events.
