

Project Summary

A wall that is clad with a new interpretation of the Tule Reed mat. Extremely dense on its river face, blocking sounds, light and movement the “mat” is a nearly opaque buffer. The highway and cityside of this structure's perimeter is skeletal, inviting views and celebrating dynamic interactions.

City tower dwellers and passing motorists will marvel at the activated ant farm with its subtle tip of the hat to this city's iconic light tower. On its flip side, the riverscape shall be shielded by this wall.....a moment to Capture Quiet.
