

This design captures the spirit of Silicon Valley as being **the world center of innovation and global influence**. Collectively this region draws people from the 4-corners of our globe to assimilate in stride to wonder, explore, and pursue the unfathomable. This specific geographical region has a very distinct grace to consistently innovate & push the envelope of what is possible and influence the world-around and how we do life by pulling from the realm of the abstract, infinite, and inconceivable and drawing it down into our tangible and humanly pragmatic and conceivable world; making a deep impact/impression and spreading/rippling across the entire planet.
