

Anchored deep in the earth and stretching above the ground towards the clouds, we are, THE PILLARS. Symbolizing all that is good in humanity's past, present, and all that will resonate into the future.

We are the physical representation of infinite human ingenuity. A triangle linking the past to the present to the future.

Journey here and free your mind to experience endless possibility through shared knowledge, communication and interaction. Co-create and connect with technology, science, music, art, and Mother Earth. Celebrate the infinite and universal power of the human mind.

THE PILLAR OF INSPIRATION:

The first Pillar, standing alone, is INSPIRATION, named for the pioneers of the past, in honor of ancient intellect and the courage of exploration that man has hunted since our world exploded into being. Explore the myths and legends of days gone by, gaze on the gardens below - lift your eyes to the sky.

THE PILLAR OF INNOVATION:

The second Pillar, INNOVATION, offers spaces to connect, share, think and discover all manner of thought, giving way to pure creation. Traveling through the tunnel into Our Roots you are able to record your heartbeat which is sent into the Heart Collective. As the Heart Collective grows with each visitor, these Chords of Humanity are sent to space. Our Earth Melody is projected as humanity's frequency in the Cosmos.

You are then elevated to the Crown of the pillar where intellectual, emotional and spiritual understanding of the possibilities of the Now are evoked. For some it will be obvious. For others, more subtle. But for all, life altering.

You feel weightless on the Cloud Walk connecting the two PILLARS. Helix stairs are lit while sensors cue music, creating The Melody of Time - a powerful light and sound experience. This becomes even more magical at night as our platforms are covered in LED lighting visible only from below, sparkling down, bringing you that much closer to the stars. With subtle sounds and music these light shows inspire those who dare to dream.

THE PILLAR OF IMAGINATION:

The third Pillar, IMAGINATION, harnesses all resources from the present, both natural and man-made. Opening a gateway to the future and capturing the very best from our World, pathways are opened to unimaginable, and infinite possibilities.

We are here to provide a place to search for answers, meditate, learn, think, work, meet, speak, wander - and wonder.

We are
THE PILLARS
