

Diamond in green ribbons

The building get inspired by both Sanjose light tower and Eiffel tower as both of them resample the light of its city and they also resample the innovation of the city and also both of them consists of 4 main pillars

As I see the location of arena green I found it hard to design something to add to it so I designed a glowing structure that get some of arena green beauty inside and add its glow to the site so it doesn't adapt to the site it dissolves in it and adds to it
