

Kaleidoscope

Probably the main characteristics of this project is its organic connection with the nature. Its identity thrives from the codes of nature, such as growth, blossom, progress or unforced yet obvious order of elements, defining its essential beauty at the same time. One can find this colorful and dynamic composition refreshing and spontaneous, and perhaps even unique in the long list of landmarks, monuments and iconic forms. Its vivid presence creates the joyful feeling of happiness and evokes the sensation of harmonious interaction between the human and the nature.
