

*10 Rings* is a proposal that intertwines human activities, creatures, and green space and elevates them into the sky. The new San Jose Landmark will create an engaging experience for visitors, a comfortable habitat for creatures, a suitable environment for greeneries. It will become a lighthouse at night. People can interact with it by walking on the floor, prompting changes to the appearance of the landmark through their movement. It's not only a landmark for San Jose but also a landmark of the 21st century, a manifesto to the world.
