

Esperanza, a symbol of human hope and shared aspirations for a brighter future, will be the welcoming symbol of San José.

A gentle winding path ascends a hill to the Summit Plaza, where Esperanza stands 100' high.

A grass-terraced amphitheater is sculpted into the 80' hill. High portal entrances at the base of the hill lead visitors into a soaring atrium for indoor community events and special exhibitions.

Esperanza is made of recycled materials, utilizes photovoltaic technology and its base hill captures rain run-off.

Two bridges will connect Esperanza to viewing mounds on the East side of the park.
