

# PROJECT SUMMARY

Competition: **Urban Confluence Silicon Valley**

Location: Arena Green, San José, California, USA.

Name of the project

## **INFINITY ARCH**

This architectural project aims to represent art, culture and urban development. It represents humanity's unlimited capability to create a surprising element seemingly impossible to do by taking the infinite symbol shape and turning it into an amazing steel and glass structure that generates a new point of reference for the city. The shape and the function of the proposed building go after the same objective: To look forward into life...

**Infinite is possible.**
