

Our iconic Landmark is a 'community gift' in the form of a Tree of Life. This heuristic metaphor symbolizes humankind's inseparable link with earth. Within the Landmark, a spiraling rotunda of innovations presents past, current, and future dreams, guided by artificial intelligence (AI) powered storytelling. An environmental ethos of vertical farming pods and living walls sustain California's Chaparral ecology, while invoking in its laminated timber construction net-zero design principles. At night, color fields illuminate the two rivers and undulating earthen mounds, inspiring emotional effects of luminosity and transcendent visions:
"So as Above, So as Below": One Earth.
