

Rain Water Catcher

The "Rain Water Catcher," a competition design proposal for the San Jose Light Tower Corporation, aims to address the global impact of climate change by advocating the role of water conservation towards the reduction of carbon footprint guided by net-zero design principles.

"Water" equals "Life," and the "Rain Water Catcher" aims to celebrate the role and importance of water in our lives.

The "Rain Water Catcher" aims to address the multiple narratives of the "importance of water," "place-making," "interaction," "technology," at the intersection of art, architecture, and engineering to create an icon for the future.
