

PROJECT SUMMARY

THE MONUMENT OF INNOVATION has an iconic image of "cloud/light bulb" that are associated with computer technology and innovation. Therefore, this design conveys Silicon Valley's spirit of innovation in the field of computer technology through symbolic means. To create a unique and breathtaking monument, the "cloud/bulb" is designed to "float" in the air. The site and landscape design is also related to the competition theme. Main features include a walk of fame and a maze garden. The "0" and "1" components are LED light fixtures that are controlled by the program for generating various patterned lighting effects.
