

Project Summary

Quark Park is designed to celebrate the spirit of technological innovation and entrepreneurship of Silicon Valley. The seed that germinated this incredible event of human cultural evolution was the development of Quantum Mechanics. Computers, Smart Phones, Internet, Lasers, Micro-chips, and Telecommunications were all designed using the mathematics of Quantum Mechanics. "Quantum Skywalk" is a sculptural representation of the intellectual construct of particle waves and the atom that form the basis for Quantum Mechanics. The Quark Park design is a circuit board through-which park visitors flow as electrons powering the activation of art, creativity, fellowship, learning and joy.
