

A magical landmark for a magical place

Representing Silicon Valley and respecting the green area and nature.

In Silicon Valley dreams come true.

The flying sphere and the landscape architecture are representing the fighting spirit and the brilliant ideas of the pioneers.

As a visitor, you can admire the landmark from several views – for example from the highway, from the park, or when you are in the cable car

The design is not only architecture, landscape architecture, a beautiful design, art, or highly technical construction. It combines all of them – like the pioneers of Silicon Valley.
