

# CONFLUENCE DOME & GARDENS

## Project Summary

*Confluence Dome & Gardens* merges art, architecture, engineering, and technology into a dome that fosters meaningful social experiences, community connections, cultural engagement, and iconic contextual identity. The dome's four levels offer public amenities, panoramic views, and diverse opportunities for spatial and social interaction. The dome's form and materiality promote a lasting impression while the *Confluence Gardens*, a continuous string of landscape features along the perimeter of the site, subtly stitch into the surrounding context and existing artworks.

*Confluence Dome & Gardens* are a confluence of art, architecture, engineering, spatial experience, and social connections for a 21<sup>st</sup> century icon and beyond.
