

## PROJECT SUMMARY

The Paths at Confluence Park is embodied by our journey that have led each of us to this iconic landscape, they represent our individualistic pursuit and our shared togetherness. Their woven form creates a park experience that is dynamic and meant to ameliorate, heighten and celebrate the perceived and latent existing conditions. This harmonic togetherness is captured with a singular distinct moment, where San Jose's long arc of history can be traced. Perched 120' above Confluence Point is The Great Overlook, from this commanding promontory, one can look back on history and forward to the future of San Jose.
