## JOURNEY IN

Our vision for Urban Confluences is an immense void in the park. An invitation to an introspective space, subtle in the surface but of great proportions underground.

The structure features a central oculus from which the visitors will enter into a spiraling ramp down the space. The continuous circulation will provide access to a public piazza located in the lower level.

The space is envisioned to be a space of reflection. A public plaza that welcomes everyone equitably. A place where to gather, where to walk and contemplate, a place to celebrate and to learn.
