

THE ARCHES OF SAN JOSE'

The Arches of San Jose' is an opportunity to bring new life to the Guadalupe River Park and the surrounding city.

Our concept is that of a multi-purpose vertical park - a light and ethereal intervention that vertically extends from the ground with a minimal footprint on the existing park. The new structure will act as an incubator for social exchange and entertainment, mixing visitors of all ages and provenience in a permeable, accessible and open environment.

Gracefully rising above the city and tangent to downtown San Jose', it becomes an iconic reference, an urban lighthouse visible from the distance throughout the day and at night.

The Arches physically embodies the progressive and welcoming character of the city of San Jose and the state of California.
