

San Jose is the hub of our digital, social, and cultural achievements, for the U.S., and the entire world. Many past icons have showcased structural achievements; from the Eiffel Tower to the St. Louis Arch.

What if we could take this idea of the icon, and turn it into a way to showcase *human* achievement, and the *essence* of the San Jose area. A new type of icon, a feedback loop, that showcases worldwide human achievement, brought back to San Jose for all to see; and a pilgrimage site for the digital revolution that brought us all together.
