

UrbaCon Waves

Urban Confluence Silicon Valley

At dusk the 120ft tall UrbaCon Waves monument will light up above the Silicon Valley skyline beckoning visitors to a spectacular light show. The two monumental waves represent the flowing together of the diverse population and innovative culture residing in Silicon Valley. Triggered by the sound of passenger planes during the day four rivers of light rush toward the central fountain igniting it and its sprays. Photo ops abound daily and at night the structure and water feature are beautifully lit for all to enjoy.
