

COME TOGETHER

This submission is informed by the surrounding natural and urban environment as well as providing a sense of place for the community. The intervention is a structure canopy of varied height to support the programs and amenities in Arena Green and to serve as the City's front yard.

The structure is horizontal to reflect the existing contextual site lines of the SAP Center, Confluence Point and elevated Highway 87. It is a multi-color triangular system as an overhead canopy or frame and vertical support columns.
