

## We Are

The iconic light tower; a 200 ft prism refracting light resulting in a myriad of colours within and around it, is sited west of the river. The colours represent and celebrate the vibrant and diverse community that has and continues to build San Jose. A pedestrian bridge links the tower to the *forest for reflection* in the east. A park with 87 mirrors reflecting the vital building blocks of the city – the people of the community - through their continuous efforts in scaling the boundaries and elevating San Jose in the fields of technology, innovation, arts and humanities.
