

Accumulus

Project Summary

Building upon a lineage of innovative architectural design, *Accumulus* lives at the confluence of cutting-edge technology and bio-inspired design that celebrates Silicon Valley's history of innovation. Through a combination of highly precise digital simulations and rigorous physical prototyping, this project makes maximum use of structural steel strips that require minimal manipulation. By day and by night, *Accumulus* activates Arena Green with multi-functional gathering spaces and integrates with the local flora and fauna. *Accumulus* stands as a monument to Silicon Valley's spirit of ingenuity and embodies a new architectural paradigm where humanity and nature coexist in a state of symbiosis.
