

PROJECT SUMMARY:

The visionary “TREEHOUSE” strives to serve central San Jose as a culmination observation deck in the three mile nature walk at the confluence of the Los Gatos Creek and the Guadalupe River. This proposed structure offers several unique features, among them are:

- * Park preserve hoisted five hundred feet in the air, gearless elevators to whisk the user quickly up to the top deck for a contemplative view
- * Creates an exhilarating, unique, exterior observation deck within urban space
- * Social activities and educational events may be programmed into this space

Finally, it must be noted that by building this regenerative landmark, San Jose will be leading the way as an innovative city consistent with the state of California’s standard of excellence.
