

## Project Summary:

Woven from the land of San Jose and representative of its most iconic feature, this design aims for simplicity and impact. The platonic surfaces that tear from the land rise to form the proud symbol of the Valley which is the clearest most recognisable feature of San Jose. Wanting to capitalise on this icon, I opted to design a landmark that feels both lightweight and outstanding in shape and outline, hence my desire to bring the symbol back to the heart of San Jose.
